International Association of Academicians for Peace Webinar:

Balance Life's Dualities or Perish

Tuesday, December 30, 2025 @ 2-3 PM Eastern

Material Dominance: The decades of effort to have physical matter dominate all else is cracking. Brain research has not found the places that generate non-material consciousness or emotion. Those who wake from near-death experiences (NDE) testify to a world of forgiveness, love, and divine bliss beyond the hospital bed. Survivors often rebalance their lives towards lasting values and service after such events.

Shrinking Population: Youth in wealthy countries continue to choose careers, etc., and delay family formation. Countries at the bottom of the birthrate ladder, such as South Korea, close schools and contend with lonely elders. A radical alternative is to lift up the value of motherhood and cultures of true love through committed, life-long husband-wife relationships.

Join us to explore ways to re-balance the male/female and physical/non-physical dimensions with our esteemed panel; we look forward to your input.

Panelists:

Dr. Staffan Berg (moderator), U.S. Coordinator, Association of Academicians for Peace

Dr. Jeffrey Nakama, Executive Director of UPF-Hawaii

Dr. Thomas Selover, President, Professors World Peace Academy International

Dr. Grace Selover, Member, National Educational Advisory Team, Family Federation for World Peace and Unification-USA

Th. D.**

President, Professors
World Peace
Academy
International

**Grace Selover,
D. Min.**

Member, National
Educational
Advisory Team,
FFWPU-USA

IAAP-US has been addressing two main areas:

1. Material dominance. The decades of effort to have physical matter dominate all else is cracking. Brain research has not found the places which generate non-material consciousness or emotion. Those who wake from near death experiences (NDE) testify to a world of forgiveness, love and divine bliss beyond the hospital bed. Survivors often rebalance their lives towards lasting values and service after such events.

2. Shrinking population. Youth in wealthy countries continue to choose careers etc. and delay family formation. Countries at the bottom of the birthrate ladder, such as South Korea, close schools and contend with lonely elders. A radical alternative is to lift up the value of motherhood and cultures of true love through committed, life-long, wife-husband relationships.

Join us to explore ways to re-balance the male/female and physical/non-physical dimensions with our esteemed panel; we are looking forward to your input.
