

Program of the WFWP-France for 2013

One of the practical goals of this year is to find a staff or few people who will be interested to work with WFWP because without team work it is more difficult to achieve and to bring results.

These people should not have too many others responsibilities in other area. Most of our members have a professional job, so they have short time for public mission.

Here are the different jobs possible in WFWP-France

Public relations and contacts

Maintain the Website and publications

Project of 1% Love sharing (support to the women and children of North Korea)

Help to organize events

Administration work and reports

Translation in French because speeches are often in English

Research of good articles in newspapers or magazines which support our ideas and objectives

Ideas to create finances

Need also an official office or a place where we can all meet and work, private home is not ideal.

Our main objective is to change the image of our True Parents in public area and find more people who will not be afraid to assist us and to testify about us.

Joining WFWP-France

WFWP is officially registered in France since 1992, People can subscribe to join WFWP by paying a membership fee. It will be good to expand not only to our members but to outside people to join our organisation. They should understand our objectives and ideas.

Delivering Ambassadors for Peace certificates in the name of WFWP signed by True Mother.

Program for the year

Each month WFWP will continue to organize in Paris an event together with others organisations UPF or Family Federation and the purpose is to invite ambassadors for Peace, others organisations and new friends on the theme connected to UN days and others important issues.

Here are the future monthly events in Paris together with UPF and Family Federation

- **Saturday 20 April 2013** : We try to invite Valérie Colin Simard, a woman writer to present her last book on “Masculin/Feminin: the great reconciliation”
- **Saturday 11th May** : event on the occasion of the international day of the family
- **Saturday 8 June** : event on the education of the children

September, October, November and December the dates are not yet decided

The main issue this year will be **on the family** and particularly to oppose this current ideology “*the theory of gender*” that influences now schools and others official institutions (also the actual government) and some associations. The teaching of this ideology of gender

is to erase the differences between girls and boys from their youngest age. That means also men and women define themselves as such after and decided according to their practices. This theory is contrary to True Parents teachings and many associations based on Christians and religious values oppose this ideology.

The great opportunity this year in France is the *Manif pour tous* which is opposing the marriage for all (Homosexual marriages and adoption of children), By supporting this *Manif pour tous* , this give us the chance to show our position and bring our contents and find Abel type of associations and Abel type people who also support family values.

One idea will be to create a material based on our teaching “Absolut sexe” to oppose this theory of gender which denies the basic understanding that men and women are different in nature but there are complementary and they have the same value in God’s true love.

Go in the provinces

As a national organisation it is important to connect with members in the provinces. France is not only Paris and it is spiritually important to connect and help in the provinces specially brothers and sisters who are doing tribal messiah in their hometown. I would like to prepare speeches to give in public places, similar speeches every time and in this way to be invited by organisations.

On 27th April I have been invited in **Lyon** to join an event organised by a woman organisation. Good opportunity to meet sisters as well.

In May I will join a forum organised in **Britanny**, it will be an opportunity to present and help the project of *1% love sharing* together with two Koreans sisters living in Brittany. I have the project to organize one day seminar in my hometown in **la Vendée** together with others members living in the Ouest part of France.

The best will be to find a key WFWP responsible person in each region.

European and International level

UNESCO

We have programs during this year in a European and international level which is also a great opportunity to invite our VIP and ambassadors for peace.

From 16 to 18 of May, the seventeenth annual conference for Peace in the Middle East will be organised in Paris , and may be one day in Unesco . So it will be the occasion to invite for this one day our contacts interested by the topic.

29-30 June a sisterhood France-Germany is organised in Bonn to celebrate the 50 years anniversary of the treaty between France and Germany

In November will be the WFWP annual European conference in Prague

If there is ELC during the year WFWP is also joining in the program.
