

21 Days Divine Principle Summer Workshop

Moieciu de Sus, Bran, Brasov, Romania, 10. – 30. July 2013

Greetings from Romania.

We are so happy to report that we have finished the 21 days Divine Principle Workshop in Romania. It hasn't been easy to fulfill this goal and secure the participation of the guests but we don't give up!

Every year our lecturers grow more and more in conveying God's word so we believe this creates a good energy to attract the attention of attendees.

The workshop was organized in 3 stages, reflecting 3 stages of growth. These stages were separated by two days in which we had special activities: between formation and growing stage was a day of unity and harmony through various games, and between growing stage and completion stage was a day of mountaineering.

The Formation stage contained lectures centered on red and blue parts from Divine Principle. The goal for this stage was to make clear all the content and new concepts from DP.

The Growing stage had the same content like formation stage but the lectures included much more guidance with many practical points which we can use in our life.

The Completion stage consisted in lectures about True Parent's Life Course, the importance of Life of Faith and about Romania vision for 21 years and the way how participants can involve and become owners of this dream for Romania through SES (Shimjung Education System).

The workshop was enriched by team activities like HDH in the morning (reading word, meditation and prayer), action tasks (helpful for team building through various challenges), Divine Principle give and take action (or lectures feedback), and presentations of daily activities or meaningful movies in the evening. Each day was concluded with Shimjung Diary which represented a way to share about the entire day, but also it's a way to discover limitations, habits which we can overcome.

The participants were very attentive and they proved this through their scores in a DP examination and through the practice of DP lectures. Comparing to last year, there was definitely a higher level of

understanding and lecturing from the participants which made us pleasantly surprised and hopeful.

Besides lectures and all the other activities, the workshop represented a way to discover ones self-identity in an atmosphere of true love, joy and enthusiasm. The participants felt that life with God is much more exciting and much more adventurous than they ever had lived before.

The next step for participants is a European MMBK Tour (FR) where they can put in practice the Principle and where they can experience the living God. Afterwards most of the participants will join SES Senior and during one year they will train themselves to become persons of true love so that they can lead future members.

We are grateful to be able to organize this workshop where not just new guests could grow but with the inspiration and grace from God and True Parents all of us felt resurrected.

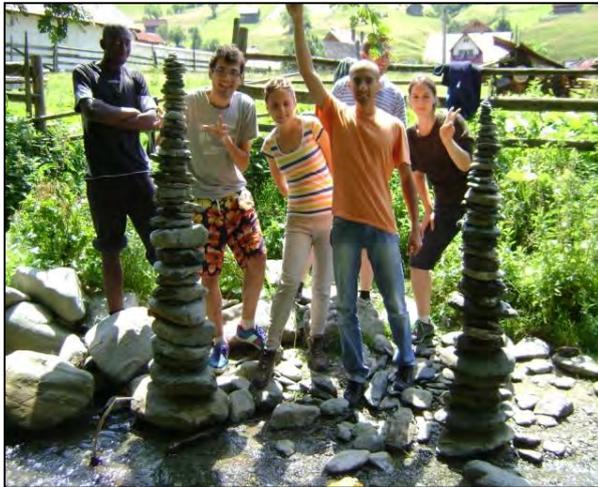

We feel ready now to start a new semester with energy and determination!
