A meeting with Professor Magno in the research room

Report. Date / Translate: JG & MG

Professor Magno came to Leda and met with Mr. Sano on Jan. 4<sup>th</sup>. Special 'parent' Pacu were selected on Jan. 5<sup>th</sup> and the preparation for another round of incubation were made. The recently hatched baby Pacu from the process that took place in late December are growing well in the ponds. Preparations are now underway for a 21-day workshop to take place on Jan. 18<sup>th</sup> in Leda with the youth of the Unification Church of Asuncion. Preparations are being quickly made.

The arrival of Professor Magno in Leda from Bahia Negra accompanied by Mr. Sano.

<Left> Professor Magno and Mr. Nakata checking parent Pacu.

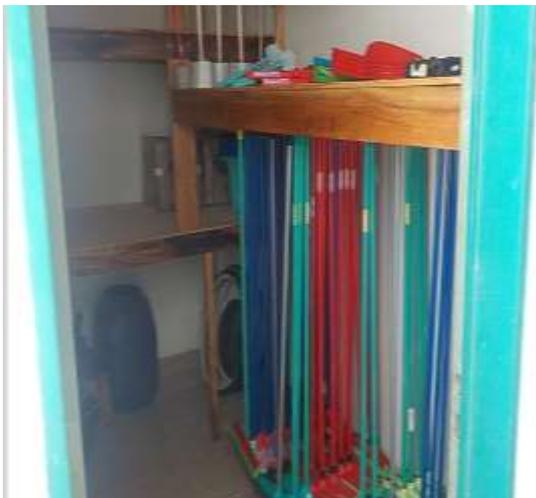

<Right> Giving hormone shots to female Pacu to promote spawning.

Mr. Nakata (driving tractor) and workers preparing one Hectare Taro field in the 2<sup>nd</sup> farm.

Mr. Kitanaka harvests ripe tomatoes in the 1<sup>st</sup> farm. He wants to work with a sincere heart and learn from the nature in Leda.

Mr. Mizuuchi who is a skilled carpenter, crafted a tool storage in the training center that is neat and easy to use.

Using left over wood and materials Mr. Mizuuchi crafted a special container for local use.
