

Strategy Presentation Heavenly Africa: Africa Will Rely on Our Strong Points

Jean Pierre Kadima

January 8, 2021

Regional Group President of Heavenly Africa

The Africa region has a great potential to meet True Parents' expectations regarding Vision 2027. During the victorious events commemorating True Father's centenary and the sixtieth anniversary of True Parents' Holy Wedding, heavenly Africa was able to see our beloved True Mother offer Sao Tome and Principe, South Africa and other key African nations to Heaven.

Who are we

The heavenly Africa region comprises five sub-regions -- North, West, Central, South and East. The total population of the African continent is 1.216 billion inhabitants, with 4,087 blessed families in total so far and 126 CheonBo couples. To fulfill Vision 2027, the heavenly Africa region can rely on our main strengths which are that more than 75 percent of the African population is less than thirty-five years old.

This includes an army of more than seven thousand young second-generation members. We also have developed a good foundation with many heads of state, and a network of religious leaders, Christian bishops and pastors, as well as schools, colleges and universities, plus other institutions. We also have member's relatives, local community leaders and like-minded organizations we could tap into. We can also rely on another advantage, which is that rural areas represent great mission fields for heavenly tribal messiah activities. Another opportunity is the fact that DR Congo, which is the host nation of the Heavenly Africa Headquarters will host the Presidency of the African Union in 2021.
