The view of Riacho completely drew water

Report: K. Date

Mr. Beniya and Mr. Nakamura arrived to Asuncion and have applied for a long-term visa. A team of workers came to Leda with several vehicles from the electric company COPACO and installed an antenna for cell-phone reception. The workers repaired the transformer, installed electric columns and made adjustments to the electric current so it provides a more stable voltage.

COPACO workers installing the antenna and new blend antenna. (Old Antelco)

COPACO truck

Repairing transformer

<Left> Mr. Mizuochi was suddenly called to repair the integrated cattle cabin working frantically in intense heat. <Right> Tosa-kun walks with a fawn without a string. The fawn loves to drink lots of milk.

<Left> Tosa-kun and Okusako-kun moving Pacu from the culture pond to a truck.

<Right> Okusako-kun is working on fileting. He has grown accustomed to living in Leda.

<Left> Juan Sosa preparing the trunk of palm trees for the Capybaras who eat one a day.

<Right> On the way between Pig-land and Retiro, Mr. Oyama and others are organizing various trees. Mr. Oyama will leave Leda temporary on October 20th .
