

## WFWP Italy's Cyberbullying and Digital Natives Webinar for university students

Elisabetta Nistri

June 5, 2020

The WFWP Italy President, Elisabetta Nistri, was invited to give a lecture to university students with AoP Virginia Vandini on the topic of "Digital Natives" and Cyberbullying.

After comparing the situation of youth before and after 2000, Elisabetta analyzed how many opportunities youth, "Digital Natives," have now to receive information, input and influences from outside of the family without any possible control from the parents.

Social Media gives us very good opportunities to share and express ourselves, but it is important to understand that it is a tool - to use for good - and that we should not become addicted to it.
