On February 25, Elisabetta Nistri, President of WFWP Italy, participated in the working table on the theme of HUMAN RIGHTS, promoted by the European Parliament through the new platform [t.me/insiemepereu](https://t.me/insiemepereu)

With great pleasure, it was noted the participation of many young people, such as high school and university students, interested in the subject and already active in similar initiatives, as well as teachers and presidents of various associations.

Mrs. Nistri drew attention to the problem of social media addiction in teens and young adults, suggesting activities that can involve parents and children, in an attempt to not only analyze and denounce this phenomenon but also, and above all, to provide prevention.

The proposal was welcomed with interest since the European Parliament is already very invested in this area. It will therefore be presented along with others, in the next public online conference.
