

NATIONAL MEETING

WITH FOCUS ON BLESSED FAMILIES

Czech Republic - Rokytnice nad Jizerou 2022 November 12-13

By Eva Pejkofski

Czech community held its first “Family National Meeting” with aim to nourish the relationships within and among blessed families and all brothers and sisters. There was a tradition of family camps and gatherings many years ago, but it has been interrupted for a long time now. We felt that it’s time to invest into quality program and time of all the generations of our community in a bigger scale again, without our families needing to find babysitting for their children for a “providence-centered” national meetings.

Although it was a short call, 64 brothers and sisters gathered on the spot, and together with those on ZOOM we had about 100 people for the Sunday Service which concluded the meeting.

Team lead by our second generation brothers and sisters prepared a very creative program for children from 4-5 years old until HARP and young adults age. This part of program was

focused on “totem hunting” - the young people were fulfilling different tasks and discovering their characters. In the end of the day they all received their totem symbolizing their strengths.

Our BFD team lead by member of the Czech Inner Healing Team, prepared “a cruise” for all adults. We cruised to the “Island of Eternal Blessing”. But because we are often facing many problems on our way, the queen of the above mentioned island sent us on a quest to visit different islands on the way, and find the answers and solutions there. We had an island focused on understanding man, another one for understanding women, island focused on spiritual balance among partners and an island focused on intergenerational communication. In the end we shared about what we have discovered and the queen (national president) gave a stamp to all, allowing them to enter the Island of Eternal Blessing.

On the second and last day, we held a national Sunday Service under the theme “Why We Can Be Proud to Be Blessed Families?” Three generations of pastors - youth pastor Ester Strkulova, vice national leader Martin Slezak and sister Blanka Buzkova representing the elder generation, shared about their understanding of the topic.

During the weekend, we had also several members of our Inner Healing Team (team of brothers and sisters who specialize in some kind of therapy or healing method such as Couching, Body Code, Acupuncture, Shiatsu) offering their time and know-how for those

present in a form of sessions for a discounted price.

Besides all that, we were surrounded by beautiful nature, went hiking, had a lot of fun, children were playing and laughing together, and we shared and shared and shared... In the very end of the meeting, Czech National President Eva Pejkořski concluded by stating, that although the intention was to balance the focus that some times turns to much on the providence and to little on the actual quality life of the blessed families, this in fact was also a providential meeting - because Blessed families are the foundation for the providence and for creating the Ideal Heavenly World!
