

4 Days Divine Principle Seminar

How to Restore Human Values

Bucharest, Romania, 31. May – 3. June 2013

Andrei Predescu

Greetings from Romania!

We are happy to announce the completion of our monthly 4 days Divine Principle workshop in Romania. We've had three new guests which came with an open heart to receive the Divine Principle content. Each one is a special person and they require different care. The workshop was peaceful and harmonious in its atmosphere. The environment is always beautiful having taken place in the vicinity of a Natural Mountain Reservation. The food was great and the lectures inspired them to deep thinking. This workshop was just one step in preparation for the summer programs, which include the 21 days Divine Principle Workshop. As such, we are happy to see that they are willing to continue and want to follow the next steps.

We pray that they will make through all obstacles and challenges and keep their promise to change themselves and to participate together in this historical undertaking as representatives of Romania.

Thank you Heavenly Parents and True Parents!

Workshop Reflections

V. Silviu (24, student)

"In the 4 days workshop I have understood the purpose of life [...]

Until now, God has been the creator of the world and people for me, although I have felt and believed that there is a direct connection between me and God I haven't understood until now what that connection is. I haven't seen God as a parent, but as a creator which watches the creation, and at the end of the life he decides if they should go to Heaven or to hell.[...]

I have understood that history will repeat until the people will become again God's legitimate children and that we must indemnify for our mistakes but also for the ones of our ancestors.

After the workshop I felt changed and when I went to the Peace Center and spoke about how I felt after I found out that Rev. Moon is the Messiah, some persons there told me that when you meet the Messiah you become a different person. I don't know if I've discovered the Messiah as a person, but I've surely discovered the Messiah as a mission."

Catalina (20, Agronomy student)

"After the 4 days workshop I have changed my thinking in a good way. Yesterday evening I have stayed and thought about about everything that has happened here and how I was before meeting SES and I realize that I was and I am still a very small person.[...]

A very important lesson for me, which I have learned in these days is that we mustn't be ignorant. If have lived our lives like this until now, then it's time to open our eyes and see the truth, God loves his children and wants for them what's good. He wants them back, that's why we've had so many chances to go back as true children, true parents and to build a true world."

P. Daniel (19, Foreign Languages student)

"I want to thank those who prepared such wonderful days in which I could discover useful things for my

future relationship and marriage. I think God wants this from all of us – to establish happy families, families centered on God's will, on God's principle and not on our own dirty cravings, directed only towards gratifying the body and to making only evil things. I felt very good among you. I have asked myself questions related to my life, my future life, my eternal life, what is permitted and what not. I think it is important to stay close to God. It's important to give, to love truly! Love must thus be manifested in the ones that are near to you, not just your family and friends, but of all the people, because we are all brothers and sisters (or we should be if we are not). I am glad that amongst you I have started to be myself.. I'm trying to think more about God. I'm trying to live according to His holy and precise plan."
