9. Listen with empathy (20 min)

Program Objective:

- The purpose of this program is to prepare an educational environment enveloped in true love, allowing parents a space in which to foster their children's willpower, compassion and heart of gratitude. God's will is that we build an ideal family and one global family under God. The establishment of Cheon Il Guk can start on the foundation of making your own family an ideal family and then being victorious as a Tribal Messiah. The Family Power Up lecture focuses on 4 perspectives to enable perfection of character and family. First, how to help the parents love reach the children. Second, how to make an environment for children to grow. Third, how parents can grow towards a goal. Forth, making clear family goals.

Features/Characteristics:

- Watch a 30-minute video lecture and use the action notebook for one week to incorporate the newly learned content into everyday life.

Reasons for recommending this program:

- The lecture is easy to follow and the content is universal in its explanation of how to make an ideal family through applying the Unification Principle in daily life.

Results/Effectiveness:

- There are many testimonies from couples who received the Marriage Blessing and parent-children relationships that have improved. Mr. Tada is being invited more frequently to give this seminar overseas and in regular schools.

Approx. Cost of running the program: Actual costs of running the seminar
