

WFWP Finland: Wellbeing, Empowerment, a Journey for Sustainable Peace

Paivi Yoshizumi
September 5, 2025

Dr. Perpetual Crentsil from Helsinki University presented an overview based on her wide research on how culture and tribal traditions can influence the opportunities of women in Africa. Chances of education are opportunities for women to move up from the patriarchal control and have influence beyond their own family structure.

Our goal is to create programs where women from different backgrounds could support each other and be empowered. Päivi Yoshizumi introduced some programs presented at recent WFWPI meetings from different parts of the world, from Ghana, Korea, Venezuela and Albania, and how the program fills the needs of women and citizens of that nation and can be very empowering to the participants and society at large.

We would like to cooperate and offer empowering programs for women in Finland.
