

**WFWP London, UK: Peace for the Planet - Small Steps for a Greener World**

Oksana Torok  
July 26, 2025

In a world that often asks for more than it gives, nature stands as a quiet, generous force - offering beauty, sustenance, and wonder without ever demanding anything in return. From the whisper of the wind to the sparkle of morning dew, nature's gifts arrive daily, unnoticed yet essential. The question posed - what are some amazing things that nature gives us without asking anything in return? This invited us to pause and reflect on this quiet abundance.

One such marvel is the Touch Me Not plant, scientifically known as *Mimosa Pudica*. With its delicate, fern-like foliage and its magical response to touch, it feels like nature is reaching out to communicate. This botanical wonder doesn't just react - it invites curiosity, empathy, and awe. It's a living reminder that even the smallest beings in nature have stories to tell, if we're gentle enough to listen.

During our final Peace Adventurers session of the season, children explored energy conservation, recycling, and the joy of movement and connection. Their drawings and discussions revealed a budding awareness of how to live more gently on the Earth - using less electricity, donating to charity, and reflecting on consumption. These are not just lessons; they are seeds of change.

As the story unfolds, we're invited into a magical forest where fairies help flowers bloom and rivers flow. These unseen beings, felt

more than seen, whisper gratitude to those who walk kindly upon the Earth. They remind us that to be a helper of nature, we don't need wings - just a kind heart.

Whether planting seeds, dancing on rainbows, or simply walking gently, every kind act contributes to the warmth of the world. The children in the image embody this spirit. They are learning, sharing, and becoming the helpers the Earth so dearly needs.

So, close your eyes, listen for the bells, and feel the connection in your heart. Nature is calling - not with words, but with wonder. Will you answer?
