

WFWP Russia Teaches Moral Education at Public School in Moscow

Olga Vakulinskaya

January 26, 2026

Moral education programs at a public school in Moscow is possible on the foundation of 15 years of social programs giving a chance to schoolchildren to do something good for elderly people or children in need, including the project "Children of Russia for Children of Africa".

On January 12th and 26th 2026, the WFWP president of Russia with her daughter Anastasia gave lectures: "Consequences of using bad words" and "Computer addiction" for 3rd and 4th grade schoolchildren.

Besides listening very attentively, children expressed their thoughts on these topics which were very deep. After the lecture they wrote amazingly moving reflections. The school administration and the teacher expressed their desire to continue cooperation in the field of moral education. They were impressed by children's reflections.

Actually now many other classes are waiting for their turn to receive such lectures, and classes that already had a lecture are looking forward to listening to other topics.

On the foundation of such cooperation, the schoolchildren of the Elementary, Middle and Highschool collected many presents for African children that will be delivered by our ensemble this year.
