Saturday 28th February of 2015, the Asociación de Mujeres por la Paz Mundial (Women's Federation for World Peace Spain) held an event under the title "Gender Ideology in Society". Around 80 guests attended the program.

The conference was truly a landmark in the history of the debate between opposing positions in regards to the Gender/Perspective of Gender and its application in society.

Meeting at a common forum and dialoguing respectfully, defending one's position and yet not defaming the other is a learning process that the Spanish society is still to experience.

This forum gave huge steps towards this mutual understanding!

National and international members of society gathered to present their respective points of views about the meaning of the concepts of gender, gender/perspective of gender and others.

Marcia de Abreu, President of the Asociación de Mujeres por la Paz Mundial, Ana Dávila-Ponce de León Muncio, Councillor at the City Hall of Las Rozas (Madrid) for the Family and the Minor; Marguerite Peeters, Director of the Institute of Dynamics of Intercultural Dialogue; who spoke about the "Origins and Development of the Gender Ideology";
