### Restoring Nature Through a Shift in Consciousness ONLINE FORUM

PWPA Los Angeles hosted another pioneering online conference with world-renowned academic leaders, bringing together 18 professors and faculty members from across the globe.

The event explored the unity of religion and science as a path to addressing today's environmental challenges. From quantum consciousness to subtle energies in DNA, panelists shared insights on how science and spirituality intersect to advance humanity and restore harmony with nature.

PWPA Newsletter - Issue 15

Dear our Supporters and Friends,

How are you? We hope this message finds you well during this busy season.

On November 15, PWPA–Los Angeles hosted the online conference, **“Restoring the Natural World Through a Shift in Consciousness,”** bringing together distinguished academic leaders from around the world to explore the unity of religion and science as a key to addressing environmental and social challenges.

We are pleased to share our **newsletter highlighting this conference** with you. The program featured engaging panels on the integration of science and spirituality, a presentation on **Energetic Mechanisms Associated with Raising Consciousness** by Dr. Glen Rein, and discussions on aligning human potential with nature's

restorative powers. We were honored to welcome **Dr. Brian Josephson, Nobel Laureate in Physics**, along with other distinguished panelists, whose insights sparked deep reflection on the role of consciousness in shaping our future.

We are delighted to **share this newsletter and recordings of the conference with you**. Your continued support makes these conversations possible, and we look forward to welcoming you to our future programs.

We look forward to continuing this dialogue with you and hope to see you at our upcoming events.

Sincerely,  
PWPA-LA team

# Restoring Nature Through a Shift in Consciousness

## ONLINE FORUM

PWPA Los Angeles hosted another pioneering online conference with world-renowned academic leaders, bringing together 18 professors and faculty members from across the globe.

The event explored the unity of religion and science as a path to addressing today's environmental challenges. From quantum consciousness to subtle energies in DNA, panelists shared insights on how science and spirituality intersect to advance humanity and restore harmony with nature.

Jordan

Dr. Brian  
Josephson

Dr. Rattan Lal

Dr. William  
Keepin

# PANEL 1: Unity of Religion & Science

*Why is the unity of religion and science essential for the progress of humanity in this age?*

 **WATCH NOW**

## DR. BRIAN JOSEPHSON

**Professor Emeritus of Physics at Cambridge University and Nobel Laureate in Physics**

Dr. Josephson discussed his work connecting physics and biology, noting that physics has overlooked key aspects of reality. Drawing on John Wheeler's "observer-participancy," he explained that quantum theory points to the role of the observer and suggested this could extend to "observers from the far," bridging science and religion. He also referenced his publication, *Physics and Spirituality: The Next Grand Unification?*, which argues for unifying science and spirituality to better understand reality.

## DR. RATTAN LAL Distinguished Professor of Soil Science at Ohio State University

Dr. Lal explained that nature's four components (soil, water, air, and biodiversity) face immense demands with rapid population growth, while 40% of soils are already degraded. Linking soil, spirituality, soul, and stewardship, he emphasized that uniting religion and science is essential for managing, protecting, and sustainably preserving these vital resources.

## DR. WILLIAM KEEPIN Co-Founder and Executive Director at Satyana Institute

Dr. Keepin described that bringing science and spirituality together is important because spirituality is the science of a cosmic interbeing. He noted that science today is largely limited to the creation plane, missing the verticality in each human. Every person replicates the cosmic process within themselves, and by going beyond the mind, can access the full infinity of divinity, showing why uniting religion and science is essential.

## DR. GLEN REIN

CEO of the Quantum-Biology Research Lab & Co-Founder of Glee Biologics

Dr. Rein highlighted that science and religion have much in common. Universally, religion calls the source God, while science calls it the quantum or vacuum—both from which all things arise. For humans, religion calls it the soul, science the fundamental energy of consciousness. He emphasized they are united, using different names for the same concepts.

## DR. J. SCOTT JORDAN Professor of Psychology at Illinois State University

Dr. Jordan noted that we can understand the cosmos as an internally related unity. He illustrated viewing ourselves as self-sustaining energy transformation systems, rather than purely physical, mental, or spiritual beings. This holistic perspective helps us recognize and manage the natural entropy costs of our existence, offering a practical approach to addressing the entropy challenges we have created within the context we inhabit.

# Energetic Mechanisms Associated with Raising Consciousness

## DR. GLEN REIN

CEO of the Quantum-Biology Research Lab & Co-Founder of Glee Biologics

In this thought-provoking presentation, Dr. Rein, a quantum biochemist, unpacks the science behind "raising consciousness," integrating biophysics, sacred geometry, yogic traditions, and new experimental findings on how subtle energies influence DNA.

Discover answers to questions such as:

- **Can we bring our consciousness into higher-dimensional reality and absorb that energy into the physical body** through mechanisms such as down-conversion via toroidal DNA, wormhole/catenoid structures, phase conjugation, and subtle geometric resonances?
- **How, and to what extent, can we resonate with this divine energy** by aligning the biofield with higher energetic layers through resonance between subtle-energy levels and the physical body?

And much more!

## Q&A

The Q&A session sparked a lively exploration of themes ranging from:

- the nature of higher energies and how they move,
- the relationship between scientific inquiry and scripture,
- and whether spiritual practices can access deeper states of consciousness.

Several professors also raised thought-provoking questions about the body's ability to store subtle energies and how such insights might influence our response to today's global challenges.

Watch the full Q&A to find out the answer!

# How to Amplify Nature's Restorative Power

## Proposal by PWPA-LA

We propose exploring what's possible when human consciousness reconnects with the origin of consciousness, renewing our relationship with nature. Natural systems, from photosynthesis to wetlands and coral reefs, show that harmony creates regenerative outcomes. Aligned human consciousness can amplify this principle, allowing science and technology to work with nature's self-healing power.

- Watch the full proposal to see how this give-and-receive relationship can help restore the Earth!

This proposal can be further explored in our publication, "An Innovative Solution for Environmental Issues" available on Amazon & Kindle.

## PANEL 2: Scientists' Response to Proposal

*What are your initial thoughts or feedback on this proposal, and how might we translate it into real-world action?*

### Explore great insights from our distinguished panelists!

Dr. Brian Josephson

**Dr. Josephson** offered reflections on the proposal, drawing from his journey of how he "moved from physics to critical phenomena and then how the brain works, paranormal phenomena, and higher states of consciousness."

**Dr. Keepin** emphasized extending science to include spiritual and ecological dimensions, highlighting the "marriage of soil and soul" for ecological restoration.

Dr. William Keepin

**Dr. Jordan** proposed moving from extractive systems to mutually regenerative processes, fostering smaller-scale, technology-enhanced and sustainable ways of living.

Dr. J. Scott Jordan

Dr. Takahiro Hiroi

Dr. Cliff Davidson

## Closing Remarks by PWPA International President

### DR. THOMAS SELOVER

President of PWPA International & Co-Coordinator of International Association of Academicians for Peace (IAAP)

Dr. Thomas Selover closed the conference by thanking participants for sharing their "highly cultivated consciousness" and creating an atmosphere that "stretched our hearts and our ability to resonate with one another and the earth."

He highlighted Rev. Sun Myung Moon's vision for PWPA: that genuine give-and-receive dialogue can raise human consciousness and deepen our ability to resonate with each other and the earth. He expressed gratitude for the "higher consciousness" fostered through the presentations and shared that the day's insights provide rich "food for thought" for the future.

Stay tuned for our next hybrid event in  
*June 2026*

**YOUR PARTICIPATION IS VALUED**

We would love to hear your insight!

Please reach out to us to share any thoughts or input you may have.  
Your contributions are greatly appreciated.
