

WFP Kiev, Ukraine - Opens a Rehabilitation Room in the Kyiv Clinical Hospital

Anna Kalmatskaya

August 22, 2019

On Ukraine Independence Day, August 22, WFP Ukraine together with local partners opened a rehabilitation room in the Kyiv Clinical Hospital. The hospital hosts many people from the ATO zone and internally displaced people with post-traumatic syndrome.

The room holds a library, paintings, and a TV, and in the future WFP will establish a music centre there as well.

The opening ceremony started on stage with musical entertainment and awards were given to all medical personnel and partners.

Officials then gave guidance and congratulations to the first patients of the newly established rehabilitation room.

Several people shared tear-jerking stories of escaping from war throughout the program, leaving everyone with a feeling of continuity and a sense of gratitude.
