

CheonBo Testimony: I prayed desperately: Please help me meet central people

Kazuya Okazaki
November 2021

I am grateful to Heavenly Parent and True Parents, whom I love. My husband, Yutaka, and I are from the 6,500-couple blessing group. We have three children. My husband and I retired in November 2005. Since then, we have been consciously working on the tribal messiah mission. We witnessed to married couples, educated all of our spiritual children and connected them to the church.

I cannot forget that before True Father's Seonghwa, I was able to report to True Father that we had completed the liberation and blessing of 210 generations of ancestors. After True Father's Seonghwa, True Mother, who was left alone, stood at the forefront and resolved to move forward without ceasing, so we decided we must help advance the vision 2020 providence.

Some years ago, my husband had a dream that True Mother called us to come to Cheon Jeong Gung. In 2013, when True Mother visited Japan, I was able to testify to her. The dream became a reality. In 2018, I realized I had to work desperately to liberate and bless my ancestors up to the forty-third generation, both horizontally and vertically. I desperately hoped to do this, so I prayed to God, "I absolutely want to succeed."

With only two years until 2020, I became so impatient inside and prayed desperately, imploring God, "Please help me meet central people that can move big groups!" At that time, news came that we could join the Cambodian providence and do our tribal messiah work abroad. We were happily surprised and realized that Heaven had heard our prayers. I went through the formalities immediately and went to Cambodia.

We were registered as heavenly treasures, as a CheonBo family, in November 2020, having restored four hundred and thirty families. We were the first CheonBo family in the Fukushima church. In our hearts, we held True Mother's determination to restore one-third of humankind.

That year, the church implemented a course for pastors across the country to raise forty-three core families. With that as our platform, we took up the goal of realizing forty-three core families for a second time for a couple among our spiritual children. We had faith that we could advance properly if we understood the True Parents' viewpoint, so we asked the church staff for lectures and also agreed to give lectures.

Succeeding together

We later realized that if we didn't accomplish the liberation of the ancestors up to the forty-third generation by the CheonBo Great Works in May, we wouldn't qualify to register a second CheonBo couple this year. So we held a ceremony to change our plan and restarted our efforts toward the 2022

goal. On the night of July 20, an official message circulated with a deadline for reporting the liberation of forty-three generations of ancestors, so we helped some of our spiritual children who had finished liberating their ancestors to prepare the report. Together we reaffirmed our determination to be CheonBo families -- treasures of heaven, at this time.

Our heart moved our spiritual children, and in order to be on time, we kept working together, screening every family and working as one team. As a result, we raised a total of forty-three families for various couples. My husband and I were able to bring and register thirty-one families who will become CheonBo families on November 10, 2021.

When the official memo had come, on July 20, changing the direction of our efforts from helping a second family to achieve CheonBo, to helping all those who were close to becoming CheonBo, my husband dreamed of Mother. In his dream, several people were in front of True Mother. My husband saw that Mother was kindly giving or sharing something. Later, I imagined it was a dream our spiritual children achieving CheonBo status.

We will continue to move forward with a resolution to restore one-third of Fukushima's 650,000 citizens and to realize Heavenly Parent's and True Parents' dream of creating one human family under God.
