

## The Way of Re-Unification - Part 23 of 28

March 1998

Republished by FFWPU International Headquarters April 7, 2024

### 3. The Cruel Nature of Communism

In their pursuit of a foundation for world dominance, the Soviets killed 70 million people. They don't think like those freedom-loving people the world over. Mao killed 50 or 60 million people for the Communization of China. The New York Times has reported on the killing fields in Vietnam and Laos. Over two million people were killed during the Korean War.

During the past 40 years of Communist dominance, over 150 million people have been killed, and many scores of millions persecuted.

Do you know how many Christians are being killed off under Communism? Do you know how many were killed off in the Soviet Union, in North Korea, in China?

The Communist Party decides whether one will make a good Party member based on one's willingness to turn in one's own parents. It's patricide or parent-killing. One must be willing to purge one's parents and siblings. Communists use intimates to purge the undesirable. How can this be? This is the greatest contradiction of all. It's the most extreme form of evil against good and the most extreme form of falsehood against truth.

### 4. The Communists' Strategy for World Domination

#### 1) The Communists' Strategy

Reverend Moon knows about Communism only too well. Communism dreams of world dominance as its reason for being.

You must understand Communism thoroughly. It has already infiltrated labor unions and the State Department. You must understand that they are all infiltrated by the Communists.

Everyone must understand the Communists. Looking at China, in 1922 or '23, it was already infiltrated by them, only 6 years after the Communization of the Soviet Union in 1917. Do you understand what this means?

Following this pattern, we know that Communism has been in existence for over 60, 70 years. It has infiltrated the United States and other places all over the world. That's why Europe is the way it is, Latin America is the way it is, and in Africa the Communist sphere of influence is already challenging capitalism in many countries. It's not the Soviets doing the fighting, but the proxies and cell-units of the

native country. You must understand this.

As I have investigated it, they have infiltrated the churches in America. Many agents are working as deacons and having secret meetings in very many American churches. You must understand that Korea has become like that too.

No nation in the world is immune from this threat. That includes South Korea. South Koreans believe North Korea will invade them someday. Americans believe that too. I have met many senators and representatives and all of them feel the threat of Communism. I ask, "Can you stop Communism with your mighty wealth?" They say, "No, we can't." They are all tangled in the Communist web. So is Great Britain. The Protestant-Catholic conflict in Northern Ireland is really controlled by the Communists in the background. So is Germany. There is no nation impervious to Communism. It's fairly standard throughout the world.

What are the Communists up to these days? They are on a peace offensive in Europe to weaken the anti-Communist forces. They are using peace slogans to infiltrate third-world countries.

The Communists lure working-class people to oppose the upper class. The middle classes are not very clear about what their position is in society and lack certainty about their class ideas.

## **2) Communism infiltrates Christian Churches**

Communism does its utmost to destroy democracy and Christian-based family values. They lure the young with drugs and stir them with anti-authority values to bring disharmony to family life. They also alienate men and women from each other. In this way, Christian authority is ruined. The Communist arrow is shattering our civilization. We must stop this.

Who is Jesus? Christian's answer is, "Jesus is the Savior." The word Savior is applied only to Jesus, not just anybody. Theoretically speaking, you cannot have thousands of people titled Savior. That's impossible. For this reason, Communism is destined to be relegated to the dustbin of history.

We must rebuild historic Christian principles. This re-building cannot be done with the old principles. We must perfect Christian personality by entering a higher level of being and character that would stand eternally.

If we say capitalism is based on democratic culture, and democratic culture based on Christian civilization, what is the purpose of Communist infiltration? It is to destroy Christian civilization. In view of this, it's important for us to know how Communism infiltrates Christianity. I sometimes wonder if the infiltration has not already been completed. Reviewing today's theological trends, it is easy to see that theologians have concluded that there is no God. That's their conclusion. That leads us to believe that the Communist infiltration of Christian principles and its breakup of the theological schools has already been completed.

The theological views center around personal salvation, holding individual salvation as the main purpose. But the Communists have begun to argue that Jesus came not to save individuals, but to start a revolution against the Roman Empire. They quote Jesus' preaching to the poor and sayings about the difficulty of rich persons to go to heaven as evidence for their argument.

They also argue that there must be no God because there was no response when Jesus cried, when faced with the cross, "Father, let this cup pass from me. But it is as You will, not I," and "Why have you forsaken me?" Therefore, God is man's own creation. Religion is in part an ethical system and cannot abrogate its social responsibility, they argue. The reason for Christian development was, they say, for the capitalists to perpetuate their superior social positions. Over 80 percent of theologians and seminary professors deny that God exists.

There are trends toward social salvation, away from individual salvation, and toward liberation theology and political theology as new names. They are trying to build a social revolution toward a secular utopia. The Communists are changing the face of Christianity. We are confronting a problem of how to change families and societies, as they are the core elements of Christian civilization.

We must realize that the hippies and yuppies, corruption, drugs, and so on are all part of Communist world strategies. In particular, free sex, homosexuality, the lesbian movement and other such phenomena destroy human rights and dignity.

It has reached a point where no one, not even theologians or national governments, can stop the destruction of the family and churches.

So, what happened to the mainstream of Christianity? It has fallen into individualism. The United States,

for example, has been completely severed from the Christian belief. Christianity cannot be individualistic. Individualism, when it expands, tends to deny the world, nation, family, tradition, and history.

I have received a letter recently from a young Communist, which warns me of the perils that churches face from Communist activities. He says in the letter that they are given money to donate to a church as they infiltrate church bases for their activities. I personally received that letter that should be exposed to the world. You must know that many existing church ministers dance to the Communist tune. You must realize that they send members to churches to work in cell-units in America. You must realize that through these cell-units they perpetuate anti-government and anti-Korea activities worldwide. We must recognize that there are established Christian ministers who are controlled by this sinister force behind them, several times removed from the scene, without even recognizing the fact that they are being controlled.

Given this situation in America, what are you going to do about America? Very soon, the Communists agents will play Jews and Christians against each other. Those are already ganging up on the Unification Church; but, once that war is over, they will be fighting each other. They have plenty of reasons to ignite a war between them. Jews already say the Reverend Moon is anti-Jewish; but once they started a war with the Christians it would be much worse. We remain silent because we know all this.

Look, everybody. You must know that there are Communists among the ranks of Catholic priests. It's true for Protestants and Catholics alike. These days, some leftist priests say Jesus was a communist. They point out, as reasons, that Jesus preached to the poor. That's true. We must understand that there are many wolves in sheep's clothing.

What is the Communist Party? It's the whip to be used for judging Christianity. Christianity must repent. The whip will not be used if we understand the cause of our own ruination and destroy the cause that contradicts Heaven's edicts and repent sincerely before God. The whip will be withdrawn then.

When faced with Communist perils, Christianity must call on its young people from all over the world and defend the nations in order to thwart the perils. All Christians of the world must unite economically and in human resources and support those nations in trouble from Communist infiltration. Reverend Moon believes that this is the last stand against the Communist ideology.

### **3) Communist Infiltration in America**

Christianity has made it possible for the United States to be the multicultural society that it is. It's one nation. But Christianity has been ruined. Now, we believe Christianity will go back to the old days when people will unite. . . .

Look at America. There are two nations in America. Virtually two separate nations in one country. There are state governments and the federal government. They have different laws. What if some want to secede? What if Germans got together in one state and Jews in another and both want to separate from the central government? It will happen, not in a distant future but soon.

Communists will make it happen soon. The Communists will try to agitate by saying, "Why do we have to pay taxes to the federal government?" What are you going to do? What if people agree and say, "We should fight the central government!"?

You might say that will never happen. Do you think the Communists would let it get off that easy? It can happen to one state, then two states, then three states, then everything will break up. America will break up. There is no guarantee that America will always remain American. There will be new nations.

If you look at the black-white situation, you can see the long shadow of Communist infiltration.

The Communists are convinced that they can overcome America's democratic system through their peace offensive. Militarily, any nation that can surpass America will be able to conquer the whole world easily. Next, they are working on underground organizations to destroy American families. They think winning over America is a piece of cake. You must know that that's why they concentrate on weakening morality and increasing decadence among the young. You cannot deny that America's withdrawal from world affairs does not help America, but actually pushes it into a greater difficulty.

The Communists want the family destroyed. They are luring good young men and women into taking drugs. To undo the family, in their plan, is to undo the Christian values. This is the crisis as I see it.

Because I know Communism and have been at the forefront in fighting it, what I have seen in American society personally gives me neither optimism nor comfort.

If you ask them, "Now, with what did you play this game?" they will say, "Christianity." Then, they will

say, "Let's destroy Christianity." They use strategies, psychology, and, finally, physical force. Good Christian families are turning into dens of drug users, which is a strategy used by the Communists.

Free sex can appeal to most youths. The Communists use this strategy to lure the young, with plenty of funds to be used in their organization.

You must understand the underground cell-units of the Communists. You must know that many students coming to America from Latin America are supported by scholarships from the Soviet Union. Americans have lost their democracy, but keep saying, "Americanize the world!" not realizing that their times have passed. America is being deep-fried, that's the true situation.

How is it in reality? Do you know what percentage of people in America are illegal aliens? (60 percent).

They are mostly from Mexico. Did you know that? When the Communists can enlist these Mexicans to their cause, America is finished. It's critical. I believe over one-third of the Mexican population will be coming to America eventually.

Here is the trouble for America. The Communists infiltrate America, then get in cahoots with the Cubans, and organize underground cell units to attack the Anglo-Saxons. When the Hispanics are under their control, blacks will join them automatically. What are you going to do when they start a destroy-the-whites campaign? They have already infiltrated the leftist elements.

After the Hispanics are Communized, they will join forces with blacks. Once they start airing their historical grievances, Latin America will join up on their side. What are you going to do, then? Are you going to run to Canada? What are you going to do? Then all the colored people of Asia will join in. Their battle cry would be: "White people are our enemy." I do believe there will be a race war. A new Civil War, a continuation of the original Civil War. What are you going to do? It's a race war, a race war. That's what's left. It will be a major catastrophe. I feel responsible for stopping that from happening.

Who will make it happen? Who? Only the Communists. If they can conquer Africa and Asia, they can play this game at their own pace. Latin America is a busy place. Asia and Africa will fall at the same time. I anticipate this kind of catastrophe for the white race looming.

If we are to warn this world, what kind of warning? Death by illness is nothing by comparison. Illness kills just one person, but Communism kills the whole nation. The United States is under a Communist threat. indeed, the whole world-in Europe, in Asia, Latin America, the Middle East, and the present United States. Can it be different?

Everyone's hands seem to be tied. America is retreating. Isn't it? It is retreating. (96-168)
