

Hak Ja Han at the Victory Gathering to Celebrate the 50th Anniversary of CARP

Gi Seong Lee
September 25, 2016

On 8.25 of heavenly calendar in 4th year of Cheon Il Guk (solar calendar, September 25), True Parents presided over the 50th Anniversary Celebration of CARP in the Main hall at Cheonseong Wanglim Palace.

Around 1,500 students gathered from Korea and abroad under the slogan "Winner! Yes! CARP!" and pledged to continue in their efforts even past the 100th Anniversary of CARP.

Cho Hyung Hee, the CARP district leader of Chungcheong gave the invocation beginning Part 1 of the event. Past CARP presidents were honored to receive Meritorious Service Awards.

Pertinent figures gave reports on Divine Principle research, the Culture of Heart, the Reunification of Korea and raising potential leaders.

The members of CARP gave thanks to True Parents for CARP's 50 years of victorious history and tradition, pledging to work toward creating a revolution in the culture of heart by inheriting filial piety toward heaven. True Parents' [Hak Ja Han's] words are as follows.

"I was very excited as I was coming to meet all of you.

From the beginning, when God created the universe, He had a dream, something he had hoped for.

When looking at the immediate results of his dream, I think in his heart he had this same happy expectation. Most of you here today, are second-generation members from parents who have received the blessing from True Parents. In that case, each of you is the "pure water" that our Heavenly Parent can feel joy toward for the first time in six thousand years. Do you understand?

Through True Parents -- pure water. You are in a position that has no connection to the Fall. Yet when we look at the environment of this fallen world, do you think we still have a long way to go, or a short way to go? You all are in the position of True Children who have received the blessing from Heaven for the first time in six thousand years. In that case, you must all absolutely become one with True Parents. You must become the pious children, loyal subjects and soldiers who will realize our Heavenly Parent's and True Parents' dream. In order to do that you must all become the best in each of your fields. In this large environment, the world, we must make a protective fence that embraces 7.3 billion people. That is why from next year, I will research ways to heal the damage in the world and the damage to humans done by the misguided use of civilization's scientific developments.

That is not all. You all like games, right? We will create healthy games for those in preschool, elementary school, middle school, high school and university, based on the providence, using Divine Principle and True Parents' global peace initiatives.

I have given the order to research this and create a general plan.

No one can go against those of you who go forward united with True Parents. CARP students, national restoration and global restoration will be done by your hands!

We must mobilize members of CARP from around the world centered on Korea, God's homeland and unite to go forth boldly toward national restoration and global restoration!"
