The topic of Father's message this morning is "Our Resolution" or determination. With the world as our stage, we know that God's dispensation has come to the point where we must make a resolution and determination for the destiny of the world. Who shall play the major role at this particular juncture of human history in the light of dispensation? Christianity. The central Christian nation of the world today is the United States so the United States must play a major role. When did this particular dispensation of God start. Right after World War II. Until that time there was no real threat or menace of Communism to take over the world. Then what happened now and today? We see the menace of Communism everywhere. We must see that the menace of Communism is everywhere and we must make a resolution to stop and eliminate this threat. The central nation of America must play a central role. As you know Communism started its first nation on the face of the earth in 1917 in Russia's Bolshevik Revolution and five years later in 1922 and 1923 they had already moved into China. Already at that time the Communists had set the goal for the extermination of capitalism. Who are the central symbols of the capitalists? The United States of America. This means already at the outset of the Communist revolution they had set the goal to exterminate the United States of America.

The cultural side of the capitalist nations is Christianity. It has become the backbone of the Western civilization and therefore when they set the goal of overthrowing the capitalistic nations, they already determined to overthrow all Christian nations. Therefore the infiltration of the Christian doctrine or Christian culture and nations has been the focus of the Communists thrust. At the present time the Communists feel that they have successfully infiltrated the Christian culture. Look at the religious world and philosophers who study about the ontology of God. They come to the conclusion that there is no God. They are becoming more and more atheistic today. Therefore the Communist doctrine is to separate the theologians and philosophers from the working Christian faith and let them become more doubtful and skeptical of the Christian faith itself.

The central theme of Christianity is salvation and individual salvation. But then Communism comes up with the theory that Jesus was truly a Communist and he came to create a proletarian state or poor people's state. Jesus was the first revolutionary. This is what the Communists were trying to describe. They cleverly use the words of the Bible such as "I came to spread the message to the poor, or the poor will see the Kingdom of Heaven, or blessed are the poor; and the richest cannot get into the Kingdom of Heaven or it is far more difficult than a camel going through the eye of a needle and so forth. These kinds of statements were twisted to justify their position of Communism.

Communists point out that Jesus was praying in the final hour at Gethsemane "Father, why did you forsake me?" and also that he made his final appeal to God asking, "Why did you do this to me?" The fact that God was silent is used as evidence by the Communists to say that there is no God. And actually man made God, that religion is just a tool to mechanize or regiment society. It is Western civilization's tool to regiment and exploit society. So they said the capitalists are trying to prolong their domination and using religion as a tool to prolong their power. This is the way that they interpret. So amazingly enough, almost 80% of the theologians or those studying the ontology of God have come to the conclusion that there is no God. So therefore they are saying instead of having an individual salvation or goal we must have social salvation as our goal, this is what the Marxists are claiming. In this way they came up with a new theology called liberation theology. It is a political theology or Christian Marxism. It is trying to replace God and make a social revolution. So therefore Communists are trying at best to nullify the power of Christianity. Furthermore, they are now saying that Christianity is based on a family systems but they are trying to incinerate or break down the family system. Father feels that the Hippie and Yippie ( Youth International Party) movement and the general moral degradation and drug situation in America are a part of the strategy of Communists to break down the family system in Western Civilization. So as you also know, the free sex problem and homosexuality and lesbian problem, all of these are the mechanical tools to break down the moral fiber of Western society. It has become so rampant that they have already succeeded in breaking down the family, the fiber of society and the Christian moral foundation, they have been triumphant in this endeavor. Their strategy has worked as expected. Christianity is really alive and vibrant. It cannot become individualistic and self- centered. Western society has fallen down to this category which is showing signs of degradation of western morality. When we expand this individualistic view of the world then there will be a further push to break down the family and social fibers and the national foundation.

So what is the Communist strategy now at this moment? The spectacular peace movement. They are trying to get the Western World to let their guard down and trying to get them to relax as much as possible so when the time comes they can strike with a clenched fist. They are saying peace, but for them it is a war cry. When they talk about peace they are talking about invasion, they are talking about aggression and infiltration. They say "peace" but one by one they are taking over small nations. So the whole world is flaming on fire, especially in Central and South America. Look at Asia and Africa. There are fires burning and the arsonists are Communists who are everywhere. Another important strategy of Communism is this. In order to conserve their own energy they are trying to wage war among the western nations so that they will fight among themselves, so they will beat each other up. So they will say look at the U.S. imperialists, they are exploiting South and Central America." "And look at all the imperialist European nations that are exploiting the African nations; and the decadent capitalist are running the world." So who will bring the liberation to these oppressed people?" "The Soviet Russian will be the liberator to bring hope; no other." "The world belongs to the farmer and the worker but they are being exploited by the capitalists so it is our right to bring it back and restore it." "The capitalists will not release their wealth so we the workers must unite." They say that "compromise will never work with the capitalists, and that the only way to go is to have a revolution and exterminate of all the capitalists." Therefore all the poor countries especially those who have an agriculture economy have a fertile ground for the festering of Communist ideology. It can prosper in these countries.

Furthermore, the Communists infiltration is really severe on college campuses. Everywhere, all the campuses in Central and South America are virtually Marxists and furthermore they are waging a racial war by saying "look all of the capitalists are basically white people and they are exploiting the Black and Hispanic races . " So when we look in the United States we see this problem here where the tension between white, black, and yellow is growing. How can we digest this, and make it into one, how can we solve this problem within the United States? The Christian principle alone can give us hope because the ideology goes beyond the racial barrier, but it should have already happened by this time. White people by giving sacrificial love should have already solved these racial problems and the racial tension. However Christianity has failed to do this. They failed to fulfill this mission. Everywhere we see the confrontation between Black, Hispanic, Yellow and White. And the Communists say only through struggle can we restore our human rights. But today look at the United States and examine the real strength of this country. Does it really have a good philosophical, moral, political, economic and social foundation which will solve these worldwide problems? This country should be prepared to do so but in Father's opinion there is no foundation. Who shall be responsible?

So then America is the hope of the world, the center of Christianity, but if this nation presents no hope to the world then which other nation will solve the problems and offer hope to the world's problems? So American families and society are breaking down and the American Christian church is not becoming powerful so where can we put hope? What about the educational system? No. The American educational system is declining because there is no moral fiber there. The American campuses are becoming a festering place for Marxist ideology. They don't respect teachers and professors and feel that these people are just trying to suck my blood; they take my money and are having a good time. They are accusing their professors to the degree that professors have no courage to stand up in front of class. It is because these problems that the Communist strategy is working and is giving the free world and society an injection, a

poisonous injection that is spreading-within the body. These are just the symptoms or signs that the Communist strategy is working. Let us then determine what is Communism. It is based on materialism and based on atheism. It denies God. What about Western values? God-centeredness was the basis of the western value system. So conflict arose between theism and atheism. A God or no God battle. In this battle who shall win? Who will be the winner that will determine the destiny of the world. So then what is the solution? The revival of Christianity. What is that revival? Rediscovering God, that is the final answer. When we make God real and the existence of God indisputable, then there shall be no more reason for atheism. How to know God. So we have to prove to the world the historical God who has been working constantly from the time of creation down to the present time and we must prove that God is active in our real life. So we must clearly realize at what juncture of human history we are now living. In what time in God's time are we living?

So once we can prove that God exists then even Communists will have no more ground on which to stand. Is there God in the churches in American Christianity? If there is a God there must be world-wide salvation, not just individual salvation. So the Communists have the world as their stage and they created international Communism And they are united to deal with the entire global problems. Communists have a clear cut goal in their history while Christianity is so divided and individualistic. Communists have no hesitation where in society they do salvation or where they are going; while the Christian and the democratic world do not have a defined goal, and are just vaguely looking for it.

If there is a God, then God must have a defined goal and destination. So that goal must be superior to the Communist goal itself. Here we cannot find God's goal in American society. Since there is not clear cut goal, Western society is just zigzagging at whim and randomly. When they hit an obstacle or difficulty they shiver or waver. "Look at the Christians, they say the Lord is coming and we are all going up into the air to have a kingdom of heaven and this world is going to be consumed". So Communism is trying to take over the world but the Christian world thinks that they don't need this world, because our world is out there somewhere else. So in the meantime they want to preserve their faith and their denomination. So even denominations don't have a clear cut goal , it is very vague.

Ten fingers should be totally united in order to achieve anything but in our Christian world it is not so, ten fingers are doing ten different things, like ten different chopsticks. So then instead, God is really trying to move this world without the judgement of fire and God's goal is to preserve this world and bring it into the kingdom of heaven. So how much difficulty God has? God must declare that when the end of the world comes according to the Christian doctrine that God himself will perish because according to Christian doctrine there will be no more room to stand for God. So this is so and there must be some revolutionary concept to try to awaken the world and bring it back from spiritual blindness into the real reality in the fight of God. God must do something and without it then God himself will declare the end of the world.

At this hour we the Unification Church members, what should be our resolution? God prepared this movement as inevitably as the mandate of history -- to this chaotic and confused world. So somebody must come out and herald the existence of God and say that God is real and that God is here, and show God's plan to unify the spiritually blinded people into one awakening. That is the mandate of history. Such a movement comes to arise and what will be the reaction of the Communist people? They look at such a movement as the arch enemy, and they will exert a clenched fist to exterminate this movement before it gets too big. This is natural because it is the worst threat to the Communists' existence. Then their strategy will be to eliminate this movement through the Christian back door. Using the Christian infiltration, using cunning and dirty tactics. Instead of confronting it from the front, instead going through the back door, but to use the dirty tricks to exterminate that movement.

So therefore this movement will receive attacks from all directions because the-Communist bloc will stand firm to stop the advancement of this movement and they will try to infiltrate from the back door. They will try to isolate it and try to attack from all directions. This movement will be an overall movement or whole movement. So this new movement will come up with a slogan to unite the Christian world. But then from the Christian eye, the claim of this movement will look heretical. What are they saying it is not conventional, not traditional. I can't join this movement. We believe that the Lord of the Second Advent is coming on the clouds of heaven but this new group says no that the lord is coming in person, in the flesh . So this new group is too revolutionary. Furthermore they are looking forward to being lifted up into the air to some Utopia or paradise but the new movement says no, our goal is here on earth, to create the kingdom of God on earth, so it is contradictory. But then from God's point of view the struggle is here on earth. If God does not take this world the Communists will. God wants to bring a better society than the Communists here on earth but Christianity is trying to run away from that goal so God cannot join with them. But then look at the Christian faith. We can ask them "Do you really think that the Lord is coming from heaven and just lift you up in the air and you will meet the Lord there and you are going to have a millennium there and you are going to live there permanently? We have to ask them from a logical and scientific point of view and all Christians will back down and say that we believe that way but I am not sure myself they confess. So in most of their subconscious, even the Christians are not sure about their own belief. How can these people give up their lives for that kind of goal which they

are not even sure of? What are the Communists saying? They say it is an inevitability that the Communist utopia will come. They say it is the mandate of history; They say that no matter what the capitalists say or are trying to do now, they cannot oppose history and history says that Communism is inevitable. They have absolute conviction.

Look at historical materialism. Karl Marx came up with this and said that in the beginning of society there was a Communal society where everybody owned everything, then it became a slave society and a feudal society then it turned into a capitalist society. Then they say there will be a Greek period of socialism then Communist utopia, that they say is an inevitability. So they say that the democratic world is only a passing period from the democratic world to the world of Communism. So they say that with absolute conviction that it is only a matter of time, and soon it will be reality. Christianity and Communism and the Unification Church they are tested out. So Christianity has been tested but proven to be powerless. That kind of idea that we will be lifted up into the air and have a millennium up there, no one thinks that this really makes sense.

Are they united and making an impact against the Communist society? No. Christian society is self-incinerating, it is falling apart. There is no fighting spirit. Look at the individualistic outlook of society now, look at the family, look at society and the church. There is no vitality and no fighting spirit. It is not only weak, it is like a corpse, like walking dead. Christianity is walking dead today.

What about Communism today? They are claiming that their ideology alone is scientific. So look at the liberal trend. They all become enamored with this kind of modernistic up to date intellectual theory.

But the Unification Church has been opposed by the Christian and Communist nations. They are opposed by both. So in our socialistic point of view all society has revolted against us. The government and nations have revolted against us. They say we are heretical and destroying our society and kidnapping their children but then under those circumstances we began our journey from individual, family, society, nation and world. Now the world, whether they like us or not cannot deny the existence and scope and goals and thrust of our movement. God of Christianity cannot find any hope in Christianity. He is completely disgusted. God has been separated from Christianity and is waiting here for the arrival of the Unification Church. Where can God really stay?

So the Communist world is colliding with Christianity and the Unification Church. Can Christianity digest the Unification Church, can they guide this world? Can Communist digest Christianity and the Unification Church? Even Christianity is still on the side of God and they still call themselves on the side of God. Can Communist digest the Unification Church? What about the Unification Church? Can we digest Christianity as well as Communism? (Yes!). If that is a true answer, we can digest Christianity and Communism and then the problem is really solved. Can we digest them both? Can we also digest the American society? The society that is infested with drug, family, homosexual, lesbianism, immorality? Do we think the Unification Church has an answer to these problems? You leaders must have a clear cut resolution. We must get out of the old traditional American thinking, "We do have the answer!" We are a new breed of people and we have the power to digest Communism and Christianity! When we come out of Christianity we liquidate the past and we become new Christians, new men and women. Therefore nothing can swallow us. We become new Christians. Super Christians. We shall become the ones. Get rid of that old concept. You are going to be new creatures, new men and women! This is the absolute resolution that we must make, we must be firm. Don't look at society through old eye glasses. Don't do this. Get out of your old system. Unless you come up with a new system and a new digestive system you will get diarrhea. That is the conclusion.

Christianity has no hope, A death sentence has already been given. Ten years ago Father came to America and clearly stated that America is declining that it would crumble. But many people protested and complained against Father saying that it wasn't true and it was impossible, and that couldn't happen. And felt that Father didn't know America enough. Father encountered many negative attitudes.

In 1974 when the Watergate Issue was on everyone's mind everyone thought Father was so foolish and felt how can you support Nixon, and how can you fight against the United States Congress. Why does Rev. Moon have to wage a battle against the government and the Carter administration? Even our leaders felt Father was making a mistake and stepping into very hot water. Many Americans thought they were so clever. Why is Rev. Moon going against Congress and why is he going against Fraser and against President Carter: They thought Rev. Moon is foolish and has totally misjudged the situation. Why Rev. Moon as soon as he came to America waged a battle against the highest possible powers of this country. Father comes from an historical background. Father knows the sad destiny of this country. Father knows that if Nixon had listened to Father, what would have happened? What if Congress had listened to Father what would have happened. President Carter, if he had listened to Father what would have happened? Father risked money and fortune and fame and the movement. Why was Father concentrating to elect Reagan? Why is a religious and spiritual leader stepping into such a very volatile water. But when history passes we will come to this juncture in history and understand how prophetic and correct Rev. Moon was. If President Nixon had the guts to listen to Father, Viet Nam wouldn't have happened the way it did. If

Nixon had supported Father the CAUSA movement would have begun in Viet Nam not in South America. It would have happened under Nixon's support. If we had gone into Viet Nam with this ideological movement then we would not have given up in Viet Nam. When we came to realize that what Rev. Moon was saying was correct the time was too late. Furthermore, unless we go strong against Satan which is left wing liberalism, and unless we fight and defeat that battle then there will be no room for Reagan's anti-Communist government to come out. You must know this.

So then when Father is going through the court battle, the true identity of the Communists comes out and we can come to see clearly where the enemies are and where the Communists are. The Communists are coming against Rev. Moon. Christianity and the U.S. government are coming against this one enemy who exposed them. Unless they have solution they cannot win but they don't have a solution. When the final solution will be effective then they have to bow down to the solution. There is no other solution out there. All these three elements, the US government, Christianity and Communism all three must surrender. So by having the first two, then Communist world remains as our opponent. Then all the faults that the U.S. has been conducting in terms of foreign policy such as the Central and South American situation or the African and Asian situation and all the racial problems. The United States has made many mistakes, and because of this these two have united. When Father fought against the United States then these countries are becoming allies of Father. The groups and organizations and those who have been unhappy about the United States policy are becoming a friend of Rev. Moon when they see that Rev. Moon is fighting for their cause.

So those countries who the United States went against, for example, Central and South America have anti-Yankee sentiment. In Asia and Africa there are so many alienated people. Around the world, because of the United States attitude, they find they have a real ally in Rev. Moon. Rev. Moon alone. Since Father is fighting against the U.S. Government and against Communism, then those people who have been disappointed with the United States and those who are fighting against Communism have to join with the Unification Church and Father. Rev. Moon is the hope for South and Central America and the hope for Africa and Asia. Those people who are trying to survive their destiny with freedom and without Communism see great hope in Rev. Moon because they have no other champion elsewhere, so Father is truly representing the world's hope and fighting this form of enemy with the cross. Father founded the CAUSA movement two years ago, and within two years' time this movement spread all over South and Central America. And this movement is coming from the top leaders down to the bottom, not the other way around. What about Africa? They do not see any other hope particularly in the United States but they see hope in Rev. Moon. So then today the Communist strategy is everywhere. Countries do not see any hope anywhere and they only see hope in Rev. Moon because Rev. Moon has made an absolute stance with conviction. Communism is evil and we shall overcome it absolutely! What do you think? Do you join with Father?

Did Father do the right thing to go against the US and President Carter and Congressman Fraser? Yes or No? Governments and Americans are very short sighted but Father could see long distance and with vision. So even in the United States the black people and the Hispanic people and minorities are gathering around Father.

Even in the media, 48% of the Washington Times readership is actually black people and only 47% are white. Many people thought Rev. Moon is creating a conservative newspaper and they think black people will have anything to do with the conservative newspapers. Golden Associates have done the foremost study our newspaper and they came to the conclusion that 48% of the population of black people are reading the Washington Times. In New York, the Noticias Del Mundo is growing every day and becoming a central activity point for the Hispanic people. So the News World and the New York Tribune are harmonizing under Father's spirit, they are harmonizing all the minorities including the Jewish people. They are a minority and they have come against Father but Father always forgave them and still embraces them. The News World has never been hostile to the Jewish Community because Father has never been hostile to them. If they want to do something they have to come to ask Father. They come to Father for help. First media help then other spiritual and material help. They now see, and they are ready to declare Father as the hero of the Hispanics.

From this concept Father devised several other projects such as the science conference, uniting all the intellectual scholars and the CARP movement going onto the college campuses. You did not know where Father was moving but Father is moving forward. Many times because of doubt and ignorance Father was not supported by you totally, not yet. So since 1978 our Unification Church has been very inactive, it has actually died down. So Father said leave them alone until I win this historical battle which is this court case and he waited for this moment to come. 1983 is that moment, this is the year. Father is coming back to point zero to make a new beginning for the American movement as the original projected goal. Father knew that some leaders among you are saying well, Father tested this out five years ago and it didn't work that well and he is just repeating this so how can we expect to bring a great victory this time. There are some suspicions raised among you and Father heard about them.

So you should be stronger than the Communists? Yes or no? Yes! So what are the Communists doing in

South and Central America? They are carrying on guerrilla terrorist war. The guerrillas are moving from one place to another, they are with their wife and children. They move by night and by day as the order is issued. Could you repeat Father's last words? This is a serious moment. It is morning. Did you hear that you should all bring tape recorders? Do you think that you just come here and go, and just listen to Father "Oh another speech from Father", and just go back with all your old habits. That is not why you are coming here you are coming here to record Father's words and give those words directly from Father to the members! This is a very serious moment. Father is revealing to you his total strategy!

Look at Cuba, Cubans are like crusaders for the Communist cause around the world. Under order they can go anywhere. They are an absolutely disciplined and regimented country and they can go anywhere under order. What about you? Are you doing that yes or no? They just live by order. If they don't listen to an order then what happens, they are shot to death. However the only difference is that we are a heavenly army they work at gunpoint but we want to do it before we are asked, we are a voluntary army. Did Father come to America at gunpoint? Yes or no? Father volunteered for this cause and is working harder than the Communists. No matter what the persecution is, it doesn't make any difference, nothing can stop or slow Father down. Father volunteered but he is working harder than the Communists, What about you? If you are working only at gunpoint you are already defeated. You must do it voluntarily, at your own will. Then you can work harder than they do, then you can have hope. Are you volunteers or are you working at gunpoint? So if you don't volunteer than go ahead, go out and earn good money and have a good life, go ahead and leave. Did you come to the Unification Church just to eat? Did you come to become famous? We don't give any fame. We are Moonies and-we are persecuted because we were divinely called and summoned by God. For the sake of God's history and humanity we have been divinely called, so fulfill the purpose of the call, we are like walking dead. Having a wife and child even is crime, eating and resting is a crime before we fulfill our course. Father is serious. What do you think, do you think Father is serious? Did you come just to see Father's face? We came to fulfill the mission. I want you to know that Father is speaking to you like this because of the mission. Our divine call. I want you to understand you are a volunteer heavenly guerrilla force. Otherwise you cannot save this country of America. This is the place for that kind of discipline and training. We must move like the most disciplined army ever to succeed in this mission. That is why March 1, Father gave the marching order. Anything that is imprinted in Father's memory from that point on shall not be erased. It will stay there permanently. Our resolution came because of this historical background. So to make a long story short, we cannot trust Christianity, we cannot trust Communism and the only people we can trust is Moonies. Wherever we go we are the hope. In the entire world there is nothing other than us. Therefore we have heavenly forces, heavenly guerrilla forces and we can do the worst and most impossible missions. We can go to the worst places. 'I shall volunteer for the worst place'. That is the kind of spirit we must have. That is the way guerrilla forces work. They never say, I want to go with my wife or I want to go with my husband or I want to have a good breakfast then I will go fight, I need a good sleep. Is that the way that guerrilla's fight. You must understand why Father is calling that emergency.

The last ten years Father has been in the United States you have been serving Father for ten years, what have you done? What have you done the last ten years? You have to repent. Father wants you to become the leaders and have the personality that America and the free world can trust. Are you that kind of leader? What about Rev. Moon and the free world and America. They are more and more looking up to Rev. Moon as a hope and source of inspiration and solution. This is happening more and more every day. Yes or no? But then Rev. Moon alone cannot run this world and the people who follow Rev. Moon should be like Rev. Moon. They should be followed and admired and looked at as a source of inspiration and hope. Is that true yes or no? So you state leaders, Father instructed you to go and fight with the state governors, with the police chief and mayors, and confront them and tell them if they don't listen to you. And say if you continue this way America will be destroyed. Have you done it? Have you visited them and told them "Let us bring the patriotic spirit back to this state"?

Rev. Moon, when he came to America he was creating a problem and confrontation with every president that came to office. Isn't that true? Beginning with Nixon, Carter and now Reagan?

We now have a mobile team, with mobile commanders and Korean leaders. So Father invited Korean leaders as the chiefs of the guerrilla force, that is the way that Father sees it. They don't have physical weapons like a gun or rifle but they have but one weapon, and that weapon is the truth, the word and heart. And Father wants them to explode with the word and heart. When we look at this situation we come to be truly the end of the world. So what is the solution and hope at this juncture of the end of the world? It is not the United States of America, it is not Christianity and it is not Communism but it is the Unification Church. Even Communism today... they have tried for 50 and 60 years to swallow the whole western world, but they know that it is too formidable to swallow and they know that even Communism is coming to its last moment, they have come to the point where even they cannot move forward. The Communists have been very successful in infiltrating the Christian Community yet they cannot digest them whole. They are too big to swallow. Instead it created a problem not only within Christianity but also within the Communist ranks. So therefore when the Unification truth, when this truth smiles upon them, when they are in touch with this truth then even Christians or Communists can turn around very quickly. Communists can turn around even more quickly than Christians.

Father can see that even Communists can see flaws within their own doctrine and ideology. The time is coming when they will see it. The Communist world has a lot of problems within itself, politically and economically and the Communists have given up hope to try to control the gigantic nation of China. So the Soviet bloc and the Chinese bloc will not come together. If the free world was really strong it would push them to unite but because the force of the free world is mediocre, they cannot unite. So the power struggle within them is becoming rampant, so therefore there is a great deal of rejection of white Communism and soviet Communism. In Africa, Asia and Europe they are rejecting Soviet type Communism.

There is a great deal of sentiment among the Communist nations that if anyone can knock down the Soviets whether they are Communist or Christians, that even Communists can respond to that. China for example. China, even though they are also a Communist country, they feel great animosity towards Soviet Russia than they have animosity towards the West. They would rather respond to the West to destroy Soviet Russia.

The time will come when the church will grow bigger and bigger and will be in a position to really attack Soviet Russia, then China will be happy to join our movement to realize that goal. So no one with a population of 1 billion, regardless of the ideology of Communism, has any way to control the people of China. The Communist system is the ration system, everything is divided by ration to control the masses. But there is no system that can divide the food for 10 billion people. No system can handle that. So Red China is quickly changing from within and trying to negotiate and work with Japan, Korea and Europe. So international Communism was the Soviet's beautiful slogan has instead become very nationalistic. They could not go beyond the barrier of nationalism. So the Soviet Russia has always used tactics of lies and deception. Deception has always been a key word in the Communists' strategy. They can lie and do anything. The end justifies the means. So they used the deceptive tactic to destroy the western nations and world. The Communist leaders use incredible dirty tricks, assassination, deception, extortion; all of these. They can create chaos in the international society if something is not favorable to them they just knock it down by any means. They are really the champion of murderers! Particular when they have occupied underdeveloped nations a massacre occurs. They not only know the Communist leadership knew what they did but also their children knew, the younger generation knows what their elders have done.

So then they use these tactics to exterminate the capitalistic society but that method will not go away and the methods will not go away, when they get power they use the same techniques within their own system. They kill each other to grab power. They have the same deception, assassinations and extortions from within their movement. So when the new generation sees that their elders are killing off all what they refer to as their enemies they don't like that at all. They are disgusted, they hate it and the young people are rebelling against it. The same repetitious cycle is going on. The young people within Soviet Russia do not trust their own leaders and at the same time they do not trust their own system.

The corruption has really become rampant, there is lack of food and famines. They borrowed lots of money from the free world but instead of spending that money for the welfare of the people they used it to make arms. The sucked money also from the satellite countries and they are using that money to make weapons to turn it around and conquer the free world. You must know that we supply ammunition. The same thing is going on in the Soviet society that happened in Western society. The young people are rebelling against the system and its injustices. They are creating weapons to exterminate capitalists but that weapon is not just killing the capitalists but the same wind is blowing into their own society. The young people in Soviet Russia are having different thinking. They are trying to get out of their society and they are rebelling against their society. This cannot be healed by their philosophy. Their world view has no power to convince their own young people because they know enough already. Therefore when you look at the free world and the Christian Community there is no hope. And if you look at the Communist society and though they claim to bring the salvation to humanity there is really no hope. So where can they find hope? The Unification movement. Those Moonies, the young people are the only hope. What do you think? Each one of you is so precious and so valuable that the free world and you can be swapped? Can you be swapped? Yes or no? Can you as an individual and the whole Communist world, can you be swapped? Yes or no? You as one individual as a champion crusader or the rest of the world? Which do you think God feels is more precious? You are more precious than the free world. You must think that I, my life is more worthy and precious that it cannot be swapped even with the whole free world and Communist world. Do you know your value and your position? Your preciousness? Do you think that God will swap the United States for Rev. Moon? What about the Communist world, do you think God would swap the whole Communist world for Rev. Moon? Do you think so? Satan would say "Okay God, I will give up the Communist and free world if you give me Rev. Moon." Do you really think that God will say yes? If you just think about it and then say now or can you instantly say no? It is the same thing, if Father is that valuable then you are too, because why? You are the extension of Father. From that position our resolution must be born. Therefore from that position Father can attack America. From that point of view, no matter how big the Communist world may be Father can attack. For that reason God needs Rev. Moon more than the Communist world or the free world; more than anything else because no one has every solution to this messy problem. You are solvers because you are the extension of Father.

You are so precious in the site of God as a state leader, that you cannot be swapped even for the entire state. We simply cannot hide behind our cloak and be timid about telling the people who you are! 'Confrontation and declaration.' These are the two words that all state leaders must be thinking of. Are you thinking that? Are you full of vitality? Are you full of the spirit of confrontation? Father is looking at you and thousands of American youth and Father is comparing. Father gave you ten years of blood and sweat and in South America they are hearing just three days of Divine Principle and they are praying and ready to give their lives. From the point of view of God who is closer to God? The American youth or the South American youth? God does not care who is more powerful or who is more wealthy. Father is thinking which young people are closer to the heart of God? So look at what God will compare? He will compare the youth in South America and youth in Asia, the Japanese and Korean and compare. That is the way God compares.

God needs Rev. Moon more even than you imagined. You are the problem. In the Christian Community there is no hope. And if you look at the Communist society, and though they claim to bring the salvation to humanity there is really no hope. So where can they find hope? The Unification movement. Those Moonies, the young people are the only hope. What do you think? Each one of you is so precious and so valuable that the free world and you can be swapped? Can you be swapped? Yes or no? You as an individual and the whole Communist world, can you be swapped? Yes or no? You as one individual as a champion crusader or the rest of the world? Which do you think God feels is more precious? You are more precious than the free world. You must think that I, my life is more worthy and precious that it cannot be swapped even with the whole free world and Communist world. Do you know your value and your position, your preciousness? Do you think that God will swap the United States for Rev. Moon? What about the Communist world, do you think God would swap the whole Communist world for Rev. Moon? Do you think so? Satan would say "Okay God, I will give up the Communist and free world if you give me Rev. Moon." Do you really think that God will say yes? If you just think about it and then say no, or can you instantly say no? It is the same thing, if Father is that valuable then you are too, because why? You are the extension of the Father. From that position our resolution must be born. Therefore from that position Father can attack America. From that point of view, no matter how big the Communist world may be, Father can attack. For that reason God needs Rev. Moon more than the Communist world or the free world. God needs Rev. Moon more than anything else because no one every even imagined to bring the solution to this messy problem. Do you follow? You are the problem solvers because you are the extension of Father. You are so precious in the site of God as a state leader, that you cannot be swapped even for the entire state. We simply cannot hide behind our cloak and be timid about telling the people who you are! 'Confrontation and declaration.' These are the two words that all state leaders must be thinking of Are you? Are you full of vitality? Are you full of the spirit of confrontation? Father is looking at you and thousands of American youth and Father is comparing. Father gave you ten years of blood and sweat and in South America they are hearing just a three days of Divine Principle and they are praying and ready to give their lives. From the point of view of God who is closer to God? The American youth or the South American youth? God does not care who is more powerful or who is more wealthy. Father is thinking which young people are closer to the heart of God? So look at what God will compare? He will look at the youth in South America and youth in Asia, the Japanese and Korean and compare . That is the way God compares.

God needs a resolution. He needs resolute young men and women who say God leave it to me I shall take this Communist problem from your head. God you don't have any headache anymore. So Father looks at American youth with two eyes very clearly. So unless in two or three years we can come back to a very righteous state that God can accept, then in two or three years there will be no more hope here in America. Then other young people will come to control you and dominate you no matter how great country you may be. How great the U.S. may be it won't make any difference in the sight of God it will become very dismal.

For that reason in order to inject hope in America Father is pushing very strong measures so that if America can respond to these measures then there is hope. If you fail to respond then America has no hope. Will you accept this or reject it?

So do you have that resolution that you are more precious than the entire free world and the Communist world, because I am centered upon God and True Parents. Because I hold in my hand the solution to this world? Father I shall act accordingly, I shall truly bring a solution. Today again, you must totally make this resolution. Father knew and he wants to leave you with one thought, Korea cannot survive without Father. Soon you will see Korea will have a movement to bring Rev. Moon back home. Asia is going to need Father, Japan needs Father. What about America? Does America need Father?

Father created seminaries and colleges, UTC and UTS and Father has not brought any Koreans to be educated or has given any scholarships to Koreans but Father gave scholarships to American people to give Ph.D., courses and give special scholarships and so forth. Father never spent a penny to make one individual famous and successful or to just live well. That was not the goal and purpose at all. It was for the sake of America and the free world that Father wanted to create the champions who really produce and bring salvation to the world. If Americans fail to respond to the call of heaven then the Koreans and

the Japanese will accuse you saying why Father sent all kinds of money to the American people but what did they do? Would you have Father just create the seminary and the scholarship program, and would you like the matching so that you can be proud of it or ashamed of it? So would you like to show Father the pride and joy of having these done here in America or do you want to bring shame to Father? Are you in a position to be proud? If anyone betrays me you shall be cursed in history! History is serious, it is truly not a joke, do you follow? Those seminary graduates raise your hands? Your responsibility is even greater because you are indebted to Father and indebted to heaven. I want you to understand you are the pioneers to the front line soldiers. Father comes from Korea and the Korean faith, do not look at the average Korean and Oriental, Father is not coming in that capacity. Father is coming to America, not to be indebted to America but to support America, to educate and teach America and Father is doing it every moment, every minute of the day.

For the next three years Father is going to guide desperately. If you cannot respond desperately. If you cannot fulfill the mission and you want to come and see me I will shut the door at you. Father is a very serious man. It is not a joke or game. Father understands these things and feels these things naturally because Father understands how God looks at things and how God feels. There is only one way God feels. Not two ways or middle ways but one way. Just one. I want you to know that there is just one way to go. Do you follow?

Even within Soviet Russia there is incredible corruption denial and rebellion within. There is a civil war going on. Look at within the Unification Church. Father is putting emphasis here in America, America is the central country. Father is new looking at the American people. Are you better than dedicated Christians and dedicated Communists? Do you think that you are better than them, are you better? Show me how you are better? You are better being a state leader for so many years and you don't have any members not even one and in some cases losing members? Then you say "Father we don't have any center, we need a little money to buy a center and rent a house. Now, so many years later, are you saying, that you are really better? So since there is no other recourse then Father invited all the Japanese and all the Europeans here to help you out, is that what you are saying that you are better?

I ask you seriously are you proud of that? You are already indebted to so many people. Already America is indebted to so many people. If you go to Japan and Korea and see how the people are living, then look at all the American MFT members and see how they are living. I want you to understand this is not the state that Father has been toiling, sweat, blood and tears over, Father is not working to create this state of things. Truly we have to become new men and women period, there is no other way out. So Father ordered to have 30,000 members by 1983 but now our goal must be 50,000 . Are you going to say well we did our best and nothing happened? When you are defeated do you have excuses? Look at your own country and campuses? Look at New York and Berkeley? Now you know what Father is talking about, and you feel it to your bones. What do you think, do you feel this to your bones? You are smiling, laughing and joking while God is crying and Father is crying. Unless we change and become different creatures then even our church will not prosper and it will be just small. Then Father will have to wipe this thing out and make a new beginning somewhere, or God will altogether get rid of the Unification Church. Are you going to be clobbered and destroyed? Is that your thinking? So how much are you going to go down to the bottom before you make it up to the top again? You may say, well Father I have done my best and I can't do any better: Because of the terrible tradition of the United States this tradition is going everywhere. Father feels that "All right, if that is the way America wants to go then it should crumble." Then for the sake of the world America should crumble then she won't infect the rest of the world. Father kept looking at America to be the hope for the world but this country is nothing but poison to the other countries then Father would rather ask God to destroy America so no more damage will be done in the rest of the world. This is the reality even though you may not like to hear this but this is reality and this is an historical declaration on June 1st. Father wants to make this absolutely clear and make a clear declaration. I know many of you will go away. We may have to be fighting a true guerrilla warfare in Central America. Are you ready for that? It is not just a word. Either life or death, there is no halfway. Either you live or die, which route would you go, for life or death? Which route would you take? You have to endure the pain of death in order to live otherwise you just float away, the wind will come and just float you away. By what would you save this country? We are the only people and you know it very clearly now, don't forget it.

So that hour has arrived and for that purpose Father has started his journey and come this far. No matter what the obstacles or delay or tribulation, Father knew that he would not bend his goal. In these situations then what kind of foundation must we lay? We must have an ideological solution then a technological solution then an economical solution and then a media solution. Father knew that our ideology and our world view are the top, and no democratic or Communist world view can compare with this. And according to the principle and the providence of God the free world and the Communist world will go away, it is passing by. So in order to throw these things away we have to have something better and otherwise there will be incredible confusion and setback. God's idea is not a setback. We have a better ideology than the free world and Communism and this is absolutely true. Father tested it out through the intellectual scholars and theologians and philosophers to test it out and there is nothing better.

Father judges today the exuberance and enthusiasm generated by the academic Community then the numbers of the seminarians will be decreased. But on the contrary the numbers are increasing and they are asking for more and more; and the more they come to know Father, the more they understand the value of Father. So whichever route they go, for example they go through Divine Principle or VOC theory or teaching of Unificationism in CAUSA, all three areas they come to the conclusion that this is it, this is the ultimate and we have reached it. So there not only eminent scholars but even Christian theologians, plus Communist theorists. As you know Japanese Communism is the worst, or the very best theoretically and logically, they are the most developed in the entire world and they are there trying to take over. They have the most developed Communist parties in the entire world. Because China and Russia are competing for hegemony in Japan, they have to have the best. They are completely resigned to be defeated and have instructed their people not to compete with the Unification Principle or VOC people; don't compete with the theory because you will be defeated, don't do it and the Communist have resigned already in the 1960s. This is the marching order to the Japanese CARP. Father then got involved in the political campaign and cut the necks of the Communist leaders, the city mayor and the governor. The Communist leadership on the campuses have been broken to pieces. Father has a victorious background. Unificationism is going to be the ideology of the future. It will conquer the world no matter what. Do you follow? Do you have that confidence? Yes or no? Have confidence.

The entire world must have a declaration of confidence and conviction that we have won the ideological battle. Next is the technological solution. Even though Korea is an underdeveloped country Father started from Korea and started dealing with the nations with the most advanced technology, like Germany, America and Japan. Father created Tongil Industries, the machine industry in Korea from scratch. When Father initiated this movement there was a great deal of opposition and the critique about Father's behavior from late President Eu and President Kim and those people who were not that perceptive. They just said Father why are you diverting your energies from religious activities to something as diverse as machinery? Father went to the factory two and three times and made so much concentration on it. Why? Because Father knew about hegemony. To have the world under our control you must have technological superiority but then Father knew even though the world did not know that this dirt, this road the trees will know. Even though the people don't know, Father's tears and heart and prayers and sweat these unchanging natures would know and they would invoke the spirit power and eventually they would let the people know. Furthermore Father selected very elite members in Japan and Germany and let them learn the most advanced techniques from the most advanced factories.

1978 Father went to Germany and studied from the most advanced technological factory in Germany. What do they do? They design with the most advanced techniques. Design, research and development, so they come up with a brand new item. We need technicians, trained technicians. When they come up with a new design then it will come to Korea where they will make it. So we make it Korea, but what country does this machine represent? It represents worldwide design and worldwide technology. So Tongil industries will jump onto the top of the technological industry and superiority. So Father wants to concentrate on further research and development and Father can repeat this kind of thing in France England and American countries. So we will develop ten items that will stay at the top of the world. So Father is on the stage of worldwide research and development, we can mobilize internationally famous scholars and engineers. For that reason we needed the science conference. Did you welcome the science conference? Now you say yes, but what about 10 years ago? You said all kinds of things about it. But now the time has come and we can relate to any kind of scholar. So we can mobilize the best theorists and the best engineers. Then we can undertake the most advanced research and development. Then all these people will invite from all over the world and we can teach them. So our most intricate accuracy comes down to a millionth of a second. Even if we push the same button and system it will make up the winner and the loser. It is all the management skill that translates into actual machine and engineering. We need technological control and superiority. Father said that the conventional concept has always been that one factory creates a machine the other factory creates a computer etc. But Father wants one factory to come up with both, the machine as well as computer. So as far as the computer industry is concerned raw material is almost nil, almost 1/100<sup>th</sup> percent. So when we put the motorized computer on the machine that will occupy 30 or 40% of the selling price. With a very small percent of raw material the computer instrument occupies 30 or 40% of the price. Therefore in terms of marketing we can control 15, 20 or 30% of the marketing and still make a profit.

So Father initiated yesterday at the East Sun building a new research and development center and invited all up to date computer knowledge and try to come up with modern technology and to perfect this system. Father is bringing brains from Japan and Germany and with the United States technology to try to come up with the best. Mr. Pak has been assigned by Father as of yesterday to do research and development. So that will link directly with Tongil industry in Korea. So once the research and development is done then mass production. Then we have to sell it. The 'selling organization is Seilo. We create a structure throughout the world.

This foundation has already been laid worldwide. Do we need it yes or no? Today if we compare the United States and Russia, then definitely the United States of America is far advanced in technology and engineering and technological skills But where the United States is behind is in the ideological realm,

there the United States is zero and the Soviet Russia has it as number 1, and they have superiority here. We have the ideological answer. But for this Unification Movement we also need technological superiority. Father can bring this thing up to the top of the world. So is the science conference a good idea, originated by Father? No academic Community can compete with Father and the Science conference.

Number three is the economic solution. This problem is one that is very important to solve. There are three parts of the economy. The manufacturing stage, the raw materials stage then sale stage. So far the manufactures have dominated the economy. Most developing nations can produce good quality materials so the production is everywhere, so then the future of the economy is determined by raw materials. Therefore between Russia and the United States are competing to get raw materials from the Third World countries. And they are competing with these two markets. Therefore Father representing the number 3 or Unification movement cannot get behind the Soviet Russian and the United States, so Father is the one who will get hegemony in South America first. Also providentially because Father is accused and persecuted by the North American continent, then Father was given the spiritual providential reason to be supported by South America, furthermore Central and South America is threatened by a Communist threat to takeover so therefore they are dying in a way, they are drowning trying to grab some kind of salvation. The United States doesn't like Communism, that is for sure but the United States has not even thought about the salvation of South America, and they are incapable of solving the problem of Communism in South America. The South American problem is that they have an anti-American sentiment there, so the threat of Communism is everywhere, so if someone comes bringing the solution to that Communist problem, then it can be solved without being dependent on the United States. They can be independent and confident about themselves; so if anyone can give that hope to South America, he has to come to our side.

Particularly several years ago Father knew President Carter's human rights policy was really tormenting South America, and that was the worst time for anti-Americanism in south America. Father sent Mr. Pak down there as an envoy of the True Parents to really give them refreshing new hope. Father then initiated the CAUSA movement in South and Central America and already that movement has spread in just a short two years to six different countries. Now from a national level we are educating those countries. The CAUSA movement will become a national movement in many countries. Father knew that when the new year came around in 1983, he would ask CAUSA to concentrate on Central America why? Because it is going to be a second Viet Nam. Russia is going to strike the United States through Central America because they want to make countries like Honduras, El Salvador and Guatemala this triangles will be the showdown between freedom and Communism. This is why the Reagan administration and Father pushed them to bet their political fortune there and they did. And now it is becoming an incredible battle field between Russia and the United States.

1, 2, 3 they are competing. Who shall survive. Reagan representing the United States has to come to Father's side. In order to survive there is no way they can win against Communism unless an ideological offensive is here and they knew, who can arm them with an ideological power except Rev. Moon? No one else has that power. The future of the American destiny will be determined by the ideological conflict. There is all kinds of ideological confusion but ideological clarity alone will bring salvation. El Salvador, Guatemala and Honduras have this same situation and who can give them that salvation? Only Father. I want you to understand this is the time for the ideological battle and this is going to be a bloody battle a showdown. The solution will be at the fundamental ground level without it there will be no political solution, no military solution no social solution. Do you follow? So by this the solution will come to South and Central America and a totally victorious solution will come. Then we won't work in the United States anymore, they will say, well I don't need you United States anymore. This year, a few months ago Father ordered CAUSA to spread in North America. By doing this, Rev. Moon is not only supporting the Central and South American cause but also the North American cause, and to help Reagan to fulfill his responsibility. So Father is involved in all direction. Therefore Father knew that all 50 states that CAUSA movement is going to be the most prosperous movement of the day because it is the mandate of the day. Therefore on March 1st Father issued the marching order already calculated this two layer movement. Father and Mother when they returned to Korea they established the nationwide VOC movement. The international Movement for Victory Over Communism. That organization so far in the Unification Movement has been the responsibility of the leaders to wear two hats, a religious hat and a VOC hat. Now Father suspended that, stopped that so that Unification Leaders will do totally spiritual work. Then Father made an external organization pooling all the external leaders of the Community like former mayors and governors and all the great people. Get the social leaders to come to organize a Hyung Sung movement from totally outside the movement so that we have a two layered movement. The time has come where the leaders of the Community and society can be mobilized. Why? Because they see the power of Rev. Moon which is permanent power. One government will come and go and presidents come and go in four years but Rev. Moon stays and his movement stays. He has a power that is growing so all ambitious people want to link with Rev. Moon. We are not asking them to join the Unification Church but join a patriotic movement, an anti-Communist movement and join together for the sake of the country, they welcome this. So, what are they doing? They are social VIPs and Father is not giving them money, they are spending their own fortunes and becoming the VOC chiefs of the county and province and villages.

This same principle is now working in America. CAUSA is that Hyung Sang movement in North America. It is going to invite all the celebrities and the important people and mobilize them for one common goal, uniting them in a union of conscience and fighting against the international enemy of Communism, there are millions of people ready to join they cannot reject it, they must work for this and they feel Rev. Moon's power and influence and that his power is growing they want to be on this side. So we, CAUSA, are going to be spreading this nationwide movement very quickly. Father's goal is that, therefore we must mobilize all the social leaders but who will educate them? You, with Unificationism, you will educate them. We will be the internal movement but they will do the external work, that is why you must educate them.

The most important thing is the link between North and South America. Father doesn't want North and South America to be isolated from each other. The Americas must be united they must not hate each other under one ideology and that ideology is the CAUSA ideology of Unificationism. So without Father the animosity between North and South America will become wider and greater and there will be a war. Father will bring peace and harmony. You know Castro's plan. They already feel that they are going to get El Salvador, Honduras and Guatemala, and then Mexico. Then they will declare national liberation against the United States. They will say the United States is the aggressor and they took that land from Mexico without provocation; like taking California, New Mexico, Arizona and Texas. All these countries will claim they were taken aggressively by the United States and they must return them and liberate them from the United States and they will make one Mexican American state into a Communist state.

Father has already given influence and guidance to the Reagan administration and to key people that this is military defeat, and if they allow this to happen there is no way that America will survive. For that reason Father hastened to create the Washington Times as an influential paper. For that reason Rev. Moon is the hope of Central and South America. They are not turning to the Reagan government for help, but ideologically and materially they are turning to Father so therefore in terms of local raw materials instead of giving that raw material to the United States or Soviet Russia they would rather have that material be utilized by Father. Father has the direction and control, and Father is moving these nations towards a certain direction. Already Father has a very precise plan how Central and South America can become economically viable entities for the sake of the free world, under Father's influence. And Father will establish it as a worldwide financial center because that nation is so ideologically located. America cannot overlook this, so then the Americans, the CIA, the FBI, these people must come to the clear conclusion that in an ideological battle no one has a greater weapon than Rev. Moon. That weapon can be realized in Central America and in America and that kind of indoctrination and education must be completed. Furthermore in 50 states they will say "Amen, that is correct there is no other solution, Rev. Moon really gave us ideological clarification."

Father looks at South America as if each nation is a state. Then the 50 states will help the 26 countries. So then America will exercise influence in North America, their own territory and in South America. By whom are they linked? Rev. Moon. Rev. Moon is the central figure. Whoever educated this nation and really lived this example and practice that education will really become the master of this land. That is the way that Father thinks and that is absolutely correct. Already Father established the Unification Seminary and sent members to the seminary and year after year they were graduating, this was a providential period. The reason Father educated you for that purpose is for this period. You are not only advanced ideologically, but also in deeds. You must become respected and admired, and when people look at you and say that these people are not only preaching but they are living an example. The result and achievement. You must stand on your own achievement. What about it? Where is your achievement? This is the time to create achievement. For the next three years we must create achievements. Doesn't it make sense? Unless you fulfill this part of the responsibility you will become drop outs. The time will come very shortly that all the Ivy League graduates will be trying to compete with each other to get a job in the Unification Church and the Unification Movement.

Father already is picking all the best brains of the country. Then when these bright people come, in just 6 months they can be far more valuable than you are. Father is not waiting for that period Father wants to push you out now so that Father wants you to become the precious leadership of our movement. Father met all the senators and congressmen and Father knew that those leaders are not capable of leading this country to God and Father knew he must create his own leadership. Father made up his mind when he saw these leaders and he prayed for that goal to God. Do you understand Father? The time will come that you will regret unless you move now, unless you are active now you will regret it.

This is an incredible formidable plan but it is not just a plan, this has been fulfilled step by step, all has been fulfilled. Father can get this kind of foundation in Central and South America, and Africa will be next. They will follow the example with no question. Rev. Kwak is now in Africa cultivating those countries. You don't know what he is doing. Raw material countries with resources, those countries will be united. The time will come when the United States of America and Russia will come to be indebted to Father. Once Father denies them they have no other way to achieve their goal. Do you feel that to the bone?

Father not only wants to get hold of influence to the resources and raw materials of the world but also the sales network in a worldwide scale. Eventually it is not the production nations or raw material nations who will control the economy of the world but the sales network will be in control. You are fundraising and selling flowers all these are not just empty efforts. Father knew that the day would come when those sales skills and techniques would be really valuable. The time will come when Father shall say no one should buy Ford, then no one will buy Fords and there will be no more market. Then Father will say buy Honda and the next morning Honda will be sold out. That is the way he will control the market. In Japan when Father initiated the financial movement such as fundraising and collecting waste materials. It was the most menial-type of economic behavior ten years ago and the Japanese officials and the media said look at these people, they are just beggars, poor Rev. Moon people; and Father said you wait and see just ten years. Ten years after we have no factories but we have 150 companies which have a sales network that can deal with every item that Father wants them to deal with. Suppose Father says let's sell handkerchiefs in three days all the handkerchiefs would be gone because they would be all sold by our network. So because of this the Unification Church sales network has become a formidable power that Mitsubishi and Mitsui, these giant Japanese corporations, want to see Mr. Furuta and want to treat him like a VIP and they are looking up to us. Father made him president of the Happy World Company and they want to hear his lecture. And they know that Rev. Moon is not just doing well in Japan but this network is going around the world. So all the Japanese manufacturers have to come to us to take their merchandise. Do you think that Father was right? Yes or no? Once Father makes up his mind our sales network will be activated and will become incredibly formidable and no other organization will be able to do this. So they know that the real source of power that Rev. Moon has. People are asking how can they do that, how can these people do that, and what is Rev. Moon going to do next?

Father began to scold you this morning from the very beginning so you feel that you have a very fearful Father but do you know that in Japan and the whole economic Community is afraid of Father? They are also afraid of Father here in the United States also. Rev. Moon's very mysterious. Because they see these things and America is afraid of Japanese power and America is trailing the Japanese in technology and management. America is now learning from Japan. The Japanese stock is way up. So is it your pride and honor to fundraise? Don't you have some desire to become congressmen? First you must know how to make money. Fundraising is just basic. In ten years Father has created from nothing, from the ground. Can't you do it. Father can do it so can't you do it too? Furthermore the tax problem is so incredible. People want to dodge taxes. So there is an incredible amount of money just hidden and floating. There are billions and billions of dollars just floating around. Father wants to use these floating funds for a constructive purpose for the world and humanity. When they have a trust established this fund can accumulate and Father is now using the former secretary of treasury Anderson, who worked under Eisenhower to come up with a top money leaders conference in the month of August. 10,000 people probably will come up with 1 billion dollars. Why are you laughing? Do you think it is too big? It is a peanut for Father. So Father's concept is not just theory but it is working and can be implemented and developed. These people know because they have researched and investigated. You Moonies are the last people to know because you don't study, you don't investigate. Now you know why Father has been accused by Americans. Is it a formidable thing that Father is doing. Don't you want to listen and follow your leader? You will not regret it!

In Korea people feel that Rev. Moon is always talking about the same thing, I don't follow you and I'm going to give up. Those people who left 10 years ago are so sorry and so miserable and some of those people came to America trying to be wiser but they became like fools. Do you want to be a wise person or a fool? Do these things and be a wise man. God thinks so and me too. Do you think that Father's concept is only on the conceptual level or philosophy or on the practical level? Where can you find such a leader? The United States President? The U.S. President has to follow Rev. Moon's instructions Rev. Moon is the one drum major. That kind of Rev. Moon you Moonies mistreated. How can you do that? Like Mr. Anderson, he has never been invited to East Garden, and his only relationship with Rev. Moon has been through his disciples and though he is over 70 years of age he is so active running 24 hours a day. What about you? You meet Father face to face and hear Father directly and Father is taking this much time to explain the profoundest truth to you. So if this is the way that you go you will be deprived of your own position, your own fate. Father is a Father of love and Father wants you to occupy that position eternally because Father and you suffered together. Father wants to give you the blessing and nobody else, but then Father knows that you are not well prepared, you have a lack of knowledge and experience so Father trained you and sent you to schools and to the seminary but you take all these blessings and you are fulfilling nothing. How can you do this? You need achievement, your own ground to stand on. You need to make a foundation which no one will take away from you. If you know Unificationism and Divine Principle that is not enough, you need Father's foundation and you must erect your own foundation and stand on your achievements because the world looks at the achiever not just the word alone, not just the written document, they want to see tangible things. Do you think that Father is wrong or correct?

Then finally the media. The media is such a powerful organization which in its own hands holds the destiny of the whole world because they have the power to influence the minds of the people; so if they wrongly influence the minds of the people they will ruin the world. If they correctly influence people they

will build the world.

So Father already understood the importance of media in the world. Father initiated the first arm of our media organization in Japan then established the News World in the United States in 1976. Then Father ordered Michael Warder to initiate a World Media Conference but he said, "Oh Father that is impossible". All the media are your enemy, how can you invite them to come to any conference? That is impossible." Then Father said if you think that it is impossible then I will do it. Father went to Japan and that is the way they started. Then when Michael Warder went to Japan he saw it and the world media representatives, so Father showed him, so he said "Father, I apologize, I think that I can do it." So he did the second and third and fourth conferences but he then left. So Father assigned Mr. Pak in charge of the News World and the media conference, then there was the 5th and 6th and all were a phenomenal success. After all there is good media out there too and they want to rally around something but they have no center and no central figure but now they have Rev. Moon so they are rallying around Rev. Moon. The Able type media is rallying around Rev. Moon and they are becoming a big powerful organization.

So Father wanted to create a newspaper in London after the News World then Washington D.C., but because of a delay in the European dispensation they did not live up to Father's expectation therefore when the time came Father did not wait. When the time came then Father marched into Washington, God did not wait. In one year the Washington Times celebrated its first anniversary as a formidable journalistic success in America. Now Father wants the Washington Times to become a voice in the wilderness. He wants to make the Times into a national newspaper in 10 major cities so everybody that is dying to hear this voice in the wilderness can read. Father already instructed you to start selling the Washington Times in your state. Father's plan is this instead of sending by mail or air freight we cannot make many copies and send them out that way out Father's idea like the Wall Street Journal and the U.S.A. Today. Father wants to send the Washington Times which is the only political ideological paper which promotes God and anti-Communism and morality and send it by satellite transmission system and print the Washington Times in 10 cities and distribute as a local paper. There are people out there, just bombarded by liberal media dying and suffocating. They are patriotic Americans, and anti-Communist Americans, moral Americans just dying to hear some fresh new word and there is no paper that is doing it except the Washington Times. Does America need it or not?

Father asks you to promote and sell the Washington Times and create a network in your region and also write a good article for the Washington Times. Do we have to give all the outside people this mission or not? You must put this into action. You must become an initiator and a pioneer and then the hegemony will be yours. The Washington Times is just one example. When Father ordered the Washington to come out he knew the providential time table and ordered it to come out March 1st and according to Bo Hi Pak's calculation it was virtually impossible and he said July or August, but Father just pushed that I just obey him and do exactly what he said. So he printed the first issue in New York not in Washington, and sent it down to Washington by plane. So we met the March 1st deadline and because of that we started to really make history. Another important aspect is that the Washington Times was created first by our brothers and sisters, they created that paper. We started and those professionals who came later picked up that tradition and carried on. They knew that even if the professionals go away the paper will not suffer. If they started from scratch then they would become arrogant and there would be squabbles and they cannot do that, though they must be completely under Father, so we are going to expand to 10 cities. So how can you become pioneers? We suffered because of the Washington Times but now we are going to prosper and it is going to become very powerful. So now you suffer because of the Washington Times, being spit at. Do you think we should just be persecuted and scolded and be laughed? It will become your asset. Those who are promoting the selling the Washington Times in your region, raise your hands. So was Father's instructions good or not. Yes or No? Later it will ask all outside people to do that. Do you want to be a part of that? Can you compete with these people? With the decades of experience. The main thing is that we may not have experience and we don't have to pretend to have experience like other professional people but we have the spirit. We will have ten cities now but soon we will have it in 50 states. We will blanket the whole country. Every facet of American life is affected by this paper. Whether you are a councilman or running for the senate or anybody dealing with this paper will become powerful and influential. Think of it, the Washington Times in 50 states. If one million people are reading it and a bad article appears about someone in this paper then it is really bad news because it is no longer just local, not just Barrytown or New York, but the whole nation will know about it so people will tremble and politicians will tremble.

If the Washington Post or New York Times tries to do it there is no appeal. The Washington Times has appeal. Why, because we have an ideological line and clarity. Who will determine the United States President? Who? Do you know that we have a paper in South America? It is a very strong paper. The Noticias Del Mundo is also strong and very important. The Spanish paper is very important. Do you know why Father made it? Because Hispanics are going to be a growing power in this country. Who will create a brand new media with a new spirit and turn the media world around who else has even the slightest possibility accept the Unification Church and Father? Is there any other possibility? Can you see? What about the Unification Church do we have that potential? You or Father? Unification Church or Rev. Moon? So Father laid the foundation, 1, 2, 3, 4. If God looks down on this earth and looks at what Rev.

Moon has done do you think God will be delighted saying good job or bad job? What do you think, do you think God will say I am proud of Rev. Moon or ashamed of him? See with your eyes. Father would like to say I am proud of you, I am very proud of you.

I want you to know that this is the final confrontation and the final war, don't you follow, don't you see it? So this time not only the media conference in September but this summer we are conducting a Divine Principle seminar and Unificationism for the media and the media people will also come together in Guatemala, 180 media people. After they finish Unificationism they will go on a fact finding tour of key Central American countries, El Salvador, Honduras, Guatemala and Costa Rica. It will have the most incredible impact for the Communist world. This is a media offensive against Communism.

So far the Communists have used the media for offensive to the free world but now it is reversed. Then in August the media team will be visiting Moscow as Father initiated last year. They will go to Soviet Russia to penetrate and see through the policy of that country. Think of it, from the Communists point of view who is more formidable? President Reagan or Rev. Moon?

The United States of America or the Unification Church? This is a very serious time.

Father has come to you to reveal his plan and desire and his strategy for North America and South America and these are Father's goal. So at this particular time you will be given the CAUSA material in lecturing so that you know what we are talking about and what Father is actually saying through CAUSA. Today until tomorrow morning will be an intensive 12 hours where you will hear incredible material which will excite millions and millions of people in Central, South and North America. You should know how CAUSA lectures developed and how you can apply to your own lectures. Father wants to see in 3 months' time that you can become top notch CAUSA instructors and Unificationism lecturers. Father will ask you to give the lectures the next time he sees you from the contents of what you will be hearing today. So when you come here next time you must be able to lecture on this subject. All the Korean leaders too. These 4 purposes are our goals. Number 1, an ideological solution, which is truth. So we have to witness. Then 2, technology. We develop our technological skill and Father asked us to have lathes in each home or center. Have you done it? Father instructed each center to buy a lathe from Tongil industries. You must know how to handle the machines and how to cut the small tools and parts. And the 3rd solution is the economical solution through fundraising. You must have a much higher education of fundraising by going to the bankers and businessmen so that these people will join with you in a larger scale to pay and join together on a certain project. We have to come to that level.

Then to stop the Communist infiltration and liberate Communists and to bring harmony to North and South America they have CAUSA at our hands. In order for you to become giant leaders of this country you have to think big and act big and do big. What do you think? Don't you see those qualities in Father? Do you think that Father is a good diplomat too? A genius in diplomacy too. Bo Hi Pak is many time helpless saying Father only you can do it, can you help us, can't you lead this land. Father often gave a mission that he could not do by himself and he would come to Father and say 'help, Father!' because Father knew, Father is a genius. All leaders should have diplomatic skills.

Bo Hi Pak is in charge of the media but this man knows nothing about the media but Father knows the media so Father instructed him what to do. Even the design of the Washington Times and the News design. This time the Washington Times got a professional first prize in design. In the world Father's design was number One in one year. How can he have this kind of skill? If you just sit and close your eyes there is no way that you can learn you have got to open your eyes and learn. Father create such a media power without knowing.

Even if I teach you and you are not willing to learn then you are not worthy to live. So now everyone critique our situation. Is this a good stage to purge ourselves and do something about it or just be an observer? So you go out and you are attacked by the media and eventually you will prevail or are you going to be a loser?

Now everyone think about this and show Father that now you have given us a goal and you have said everything and we shall know where we are going and we shall give our lives and we will fulfill it unto my death and bring the victory. Amen? Amen. I want you to know these are the best solutions and there is nothing better in all history. This is the best opportunity in history therefore Rev Moon knew this and that is why he is going forward giving his life for this. What about you did you give up your life for this? Yes or no? Obedient to the order. The time has come and it is apparent that the wisest way is to follow Father's way. If you critique and analyze you are the one who will eventually suffer. Even Father was persecuted all this time but everything Father undertook became a success and in the future it will be the same. Father will go and succeed period. If you are trying to do your own way you won't succeed, think about it. When Father said to Bo Hi Pak, go ahead, Reagan is going to win this election so you mast print even 24 hours early that Reagan is going to win by a landslide. If Col. Pak was to say Father that is ridiculous and I can't follow that kind of order. So most people would say that is beyond common sense and that is a very foolish thing to do and we are going to be embarrassed and I am going to save your

face. But then what happens? Father is gambling in faith so what should people like Bo Hi Pak do? Obey Father and fulfill it, that way it becomes history.

Of all the papers that were printed after the Reagan election only the News World predicted a landslide. At the anniversary of the Washington Times everybody said, including the newscasters said, that everyone had predicted that this paper would never get off the ground and that it would never be a success. But what happened? He broke every expectation. This is the formula that Father is following, and every time Father follows that formula it works. This is an actual reality. This is not just a dream this is the real world and an actual reality. Now once and for all I want you to do me a favor. Now I want you to think Father my life is yours , I have made up my mind, my life is yours. I will give my life for the sake of this mission. I will bring a victory and I will bring it to you!
