

God's hope is the liberation of His homeland

Sun Myung Moon
February 14, 1988

14. Where is God's homeland? It is the place where True Parents and the True Family reside. Where is the True Parents' original hometown? It is the place where God and His sons and daughters reside. Where is the True Parents' homeland? It is where God and all His children, the subject and object partners whom True Parents love, are dwelling, the place where you can find the love of subject and object partners. If this were so, then where would you find the homeland of the children? It would be a place where they can love their parents with God as the subject partner, and where the children can receive love as the object partners. Such a place is the original homeland of the four-position foundation as taught by the Unification Church. That is the ideal homeland. Why is it the ideal homeland? It is because in it we find the love of the True God, the love of True Parents and the love of True Children. The world that develops from there on that basis will be an ideal world. Such a principle is to be found in the four-position foundation. (124-268, 1983.02.27)

15. The homeland is the nation of the mother and the father. It is the nation of our ancestors. It is the nation of the first human ancestors. It is a nation handed down from, and loved by, the first human ancestors. Since that love of the first human ancestors is unchanging, then that nation should be unchanging as well. When you consider the historical course of those who claimed their nation as their homeland, you can recognize that there has not been a single nation that could maintain itself as the parents' beloved homeland. That homeland has been lost, over and over again. (173-168, 1988.02.14)

16. The people who live for the sake of Heaven today are Heavens secret emissaries sent into Satan's world. Everyone is different, so an emissary may be big or small, stout or thin, tall or short, but his or her lifestyle cannot deviate from that of an envoy. This is because life and death are always hanging in the balance. They are posted in a situation where even the smallest mistake can determine the issue of eternal life. Therefore, the secret emissary's spirit of working for the homeland, the homeland that can support and protect eternal life, has to be hundreds of times stronger than their environment; otherwise they cannot live as a secret emissary. A secret emissary has to ignore their present situation by thinking of how the people of the world will rejoice when all resentment has been erased. They have to look to the glory of the homeland and, while they create a new history, think that the world will know and applaud their efforts on the day that witnesses the birth of the homeland. Without such a mindset, they cannot carry out a secret emissary's mission. In other words, to overcome all resentment and execute their mission, they have to live in hope for the dawning of a homeland that is ten thousand times greater than their present reality. (029-040, 1970.02.16)

17. For the liberation of God's homeland, we have to take down the barrier between North and South Korea at the 38th parallel. Then this homeland has to rise as Asia's new fruit, a fruit that we can proudly display to the whole world. Our mission is to overcome the devastation wrought through the history of the Korean people and form a new culture. Therefore, even though we have been weakened, we have to clasp each other's hands, move forward, and make a pledge while raising our hands toward Heaven. Please know that this is the moment to form a new culture and prepare for tomorrow with an alert mind. We have to guide the environment with love for the country and the world. (036-201, 1970.11.29)
