

After Breakfast at East Garden
May 14, 1994

Translator: Mr. Joo

UTS professors must read Father's speeches in the original language, not second hand. Have to solve the language problem—True Parents bring solution, True Parents' language is the only way. Based on True Parents make True Family, Society, Nation, World—only one language of True Parents. There is so much damage and waste due to language barrier—confusions. Diplomatic problems are blamed on language—"I didn't say that, it was translated wrongly!" Translations of the Bible in many languages has led to many denominations with different interpretations. If we have many Divine Principles in different languages we will have different denominations in our movement—you must learn one language. You must solve cultural difficulties between East and West through one language—urgent!

When you study original Father's words you will see their value. World Theologians will be interested in Divine Principle—in the original language. They will check the exact words, meaning, particularly of Father's speeches which are now 210 volumes and will be 300 volumes. In the future scholars will focus on each page of Father's speech. If you don't know Korean you cannot participate—you will be ignored. Study original Father's speech and Divine Principle or your authority will not be respected.

In Jin Nim finished her degree at Harvard Divinity School. Father observed how smart she is—she took only 1 year to complete the 3-year program. Father and True Children will test you when you come to East Garden—that's reality. Don't think only one True Child is smart—they all are. Whatever you do must be based on Divine Principle or it has no value. Father observed True Children have great academic backgrounds from their studies. Be careful—True Children will call you and test you. True Children have authority not just because they are Father's children but because of their own ability. Kook Jin Nim's professor has to prepare at least 1 week for each class or gets into trouble. To study in America you have to read an enormous amount of books. Mr. Peter Kim spent 2 days to write a paper and that was not enough to do a good job—Un Jin Nim finished in 1 evening with no problem.

Study Korean. You are young enough, half of Father's age. Mr. Peter Kim is a better translator than Col. Han because he is younger. When your children get an international blessing you will argue about which language to use in the family—True Parents' language, hometown language. Only 1 language, not 2 or 3—only 1 True Parents. The family is a very important issue, especially in America. Now we have the Family Pledge—educate people with this pledge, use it to solve problems.

Think about giving lectures in Korean, at Sun Moon University. If you give lectures in Korean at universities you will be very famous. In the future PhD's will be given to those who study Father's words in every area—Father spoke on every topic. In Germany Father made an engineering company with high technology—Germany is strong in engineering and we became top. Japan is strong in electronics and we have Wacom, and media in America (Washington Times). You should consider achievement, accomplishment, not just ability. PhD is not enough—need substantial achievement. People made noise against Father but now they are quiet. Father made such remarkable accomplishments, if Father announces he is going to Washington

DC everyone is nervous, shaking! If Father goes to Japan or Korea, everyone follows and listens to what he says, really pays attention to what Father is doing because it is always meaningful.

There are 800 UTS graduates—Father expected them to work in mission but Father can't see them—where are they? UTS graduates should give a hard time to their professors at graduate school—then after graduation come back and lead the professors the right way; but your chance is missed now. UTS graduates made very good students at Harvard, etc., now you can meet them as colleagues and lead them with better theory—lead the theological world in the right direction. After graduation write research papers and publish in renowned journals. Study the most recent academic disputes. You are qualified to criticize their theories based on Divine Principle and Unification Thought. Those papers will be published and given to our library. We must build a library not only of theological books, but our own books—it should be the center of theological research. People who studied in a Christian library will realize our library is so much better and be attracted to study more to understand everything.

Father's idea is to make you world famous theologians but you didn't follow that direction. Father wants you to be better than he is, do you understand that? Quality is important—publish quality research and papers—that will dominate the world. Review all theories historically and write clear conclusions about where to go now—that kind of book will be really respected. Publish in all areas, not just theology. In the future being invited to UTS to lecture will be how to become famous. You will be asked to present the most updated theory at all universities. All of you should become this famous, in every area. Then UTS will get the reputation as the best center of theological research in the world. Even scholars with a PhD from other schools will come to UTS for post-doctoral research—the whole world will come under UTS. Father is creating a new university at Bridgeport, but more internal standard at UTS—University of Bridgeport is external, UTS is internal is Father's vision, but it is not yet fulfilled.

If you understand Father you should become leaders for all areas, not just one. You should be an expert in your own area and impact the world. Father approached the top (Nixon) first when he came to America. As a PhD your ambition should be to reach the top world level, not the middle. Father has been persecuted, but you have respectable titles—professor at UTS—so you can accomplish on the world level. Father's situation was so difficult, but he accomplished. Don't just sit down in 1 area, but challenge bigger and higher areas, then people will respect you even if you die. Through AFC state legislators really respect Father—if Father died in America would they just put him in a public cemetery? No, in a very respected area. They will recognize that Father did really useful things and use them for educating youth—they will visit his shrine and study his life and work. You have to have confidence to be like that.

Do you want to die for 1 campus or whole country? It takes 1,000 times more effort, your life. You have to become number 1 professors then your influence will go beyond UTS. Father's plan is not to limit you to UTS only. There is no university like UTS in this country, because there is no ideal family. When there is ideal family it becomes ideal society, nation and world. Now a whole encyclopedia can be carried on 1 CD and read in your home. The key issue is not how many books, but who has ideal family system. If you establish the ideal family the world will follow that. Father created Washington Times even though there were 1700 daily newspapers in America. Father has a unique idea so it became successful. Concentrate on this ideal family system and it will solve all problems. You should be proud of the ideal family.

Think of your age and how much you can do. Think about where you are—if you worry about getting a job, feeding a family, these are trivial things. If you can't overcome low level problems you can't be respected by the world. Father made this much accomplishment but we can do more—hopeful point of our church. Father accomplished everything in 40 years—you do it in less, think about it. It is amazing how Mother could accomplish in 18 months what Father did in his whole life—Mother inherited all Father's victory and the whole world knows it. Mother's life was also very difficult—lonely, ignored, isolated. Now she overcame and succeeded, and is respected by the whole world. If you overcome all difficulties and persecution you will be respected, your children will appreciate and respect you. You have to make the same kind of foundation in your family as Father made. What Father demonstrated you should follow.

In the future will people respect True Mother and True Children? Think about influence on history. Father didn't see any PhD's who volunteered to introduce Mother on stage in their hometown during the speaking tour. If you did then people would erect a statue of you because of such a memorial day. Your relatives may have persecuted you as brainwashed, but now they see you are successful because of Rev. Moon—how proud of you they can be. Unfortunately that time has past. Father gave direction for 3,000 campuses and nobody moved. Now Father gave strong direction so you are beginning to move. You should be campus ministers and give lectures in 12 campuses every month—how famous you will become. Take action! Don't just have interest, take action!
