opening prayer of gratitude

Most Honorable Heavenly Parent

Beloved True Parents of HEH

Together with the subject SW, Heavenly Parent, please guide us to add devotion upon devotion with the heart of attendance. How many children truly understood True Mother's Heart, the circumstance that She could not speak of and that have worn Her down. Please guide us to be the children to empathize with Mother's unspeakable circumstance and comfort Her.

Gathered in this Place, this is the Throne of Heart, let us cry out with tears of repentance saying, 'I missed You so much, with repentance that such an unfilial heart will never happen again'. At this starting time, yearning and desiring that we become those who offer this devotion with all our hearts

Kim Yon Su

Gratitude

2nd daughter of 2

I was a timid child that would cry to be separated from my parents and would hide behind them from strangers. Both of them would work and I would cook dinner alone... I would hear my father coughing and there was blood on my hand from him... I was crying... and he said, 'Why are you crying'

My father said to comb his hair because he had to go out, and after he went to the hospital, that was the last I saw my hospital... I bought for a small cake with the money I had saved and when mom came home, I showed her the cake. Mom, thanked me and ate at small bite and went back to the hospital.

I felt resentful that dad left, and his memory was becoming more and more distant. My mom worked so hard and raised my sister and me without any lack. I hid my feelings that the family would not have a hard time that I was missing my dad too much and I looked away when they spoke of him. I asked why I had this situation with my mom being Japanese.

When days when we had to gather parents signature on homeschool correspondence, I place my paper at the very bottom so mom's Japanese name would not be visible. I hated my father for making me think this way. Even so, I thought I had to endure well on my own. And I tried not to be a burden to my mother.

Since in high school, I earned money with part-time jobs and earned my school tuition by receiving scholarships. Afterward I got a job and worked without rest for 3 years... I felt burdened not to reveal my pain to my mother. I endured by making sometimes a thousand cakes a day at a famous bakery.

Afterward, I would be getting the Blessing well, and I thought I had not made my mother struggle and I asked myself if everything was okay now.

I decided to look back on my church life that I had been neglecting, wanting to build a good family. I spoke as little as possible in gathering, at first doing my devotion quietly, but I was led to take on roles of leadership and ever holding the microphone.

One day after vigil, my father then appeared in my dream. He had appeared before occasionally but never spoken... That day was different. We were sitting on the stairs leading up to the Great Hall, singing a song together while looking at a large, full moon. (tears)

We sang a children's song I used to sing with my father. He would sing, 'Daughter, daughter what kind of daughter. Run like a train... And I would continue 'Where did you rise? You rose beside that...

Singing that song, I could feel my father comforting me with the emotions I had suppressed for 12 years. I could feel his voice and gaze (tears) I could feel how much he missed our family and how desperately he wished for one of us to come to Cheon Shim Won. My mind felt so clear and as if it had happened just a minute ago.

When I got up I saw that there was a full moon. I thought of my father existing in the SW, but it never

touched my heart. This experience changed me to know True Father is also in the SW right now giving us comfort.

I came to know True Father will not just stay still in the SW but will come to us to know True Mother's circumstances and would always come to us if we opened our hearts. I realized that True Mother's experiences of looking at the moon for True Father were actual experiences, and that our prayers truly move the SW.

This helped me make foundation for my family better, with my husband who found it difficult to come. I knew that praying for our church and family would be easier as Heavenly Parent and True Parents wish.

Whenever my heart is heavy, I will look at the full moon again and remember my father and Heavenly Parent and True Parents working harder than anyone else. The CP is a place that brings realization and I will guard my family as my parents did. To them and my husband and Heavenly Parent and True Parents, I want to offer my gratitude...

'Butterfly Affect'

Cheba Ahaka

Testimony

Joined the academy. I had grown up with faith being as much a part of my life as anything else, but it was not what I had chosen or grasped for myself. Even with various WSs I questioned if I was truly connected to Heavenly Parent and True Parents.

An event left a deep wound when I ended my Blessing, and I questioned what it was that I believed in until now, and my self esteem collapsed as well. That I could not go on like this remained, so I participated in WSs, but still not having connection conviction.

In that state, I heard the news of the 15th Yeongseong Workshop and I felt I must go and I participated to truly know the Heart of Mother with earnest, but still I could not feel anything and asked myself why I am only capable of this much. Mother's Testimony came.

My mother had been imprisoned by her family when she couldn't even go outside. I realized that Mother thought of Heavenly Parent's Heart rather than her own pain and I was shocked and my tears wouldn't stop, and that image overlapped with my mother's path, and her not giving up, even denied by those she loved and trusted.

Only the words, 'I'm sorry. I'm sorry' was all I could do. I realized that I really wanted to make Mother happy, and that I had been doing nothing from that heart. The desire to change was greater than feeling my lack. I served as a captain of the cafe team for 4 months, but it was not easy. I could not set the direction well and saw the members confused. I thought why am I so incapable and I felt sorry to the team members.

Also, communicating in Korean was not easy and the more I could not say what I wanted, I just wanted to run away a lot. I continued to pray, 'Heavenly Parent what must I do now?' Mother's Heart came to mind, with Her Heart broken, worrying about each and every one of Her children. Are they eating well? Are there moments when they could smile?'

I thought it would be good if even one person's heart could be warmed and Mother's Heart conveyed while walking the path of faith, Mother might also be happy. So, I tried not to lose my smile and people would even say, 'Your smile is nice and you gave me strength too'

I realized Heavenly Parent could be happy by this and even to convey Heavenly Parent's Love just a little, although I am lacking, He wants to work through me. And I am walking this path building devotion day by day to repay even a little the Heart of Heavenly Parent and Mother. I will not forget the heart I received and be a person to repay it.

'The Night of Light'

HJ Report

Pang Sang

Secretary General of TC

Beloved and respected Unification leaders and members, hello... gratitude for this precious time today despite my inadequacies.

Our church is presently in crisis but we know that it can also become a chance. Thinking of the people with Moses with the sea in front and the Egyptians behind them. Moses embraced the people of fear and prayed only to Heaven and moved forward without fear and ultimately saved the Israelites.

True Parents also live in loneliness and crisis every single day. That responsibility was the weight we cannot even imagine and I hope we realize the Cheon Shim Won devotion we are offering is the perfect change to overcome this crisis. When PL shares his message, just preparing for the message itself can give a lot of grace and I will try my best.

Just as one drop of water brings a chance the burning of one's throat. True Mother said in a battlefield resting is forbidden, not to take our eyes off the target even for a moment. The original of our life is True Parents, if we cannot keep those Words, what will happen to our lives. Not to let Mother's Words fall to the ground..

Among the many sins, what is the greatest? Confucius said it is unfilial piety. The greatest sin before True Parents. A filial child is not just someone who provides for their parents but someone who shares what their parents worry about.

What does Mother desire? There are many things but isn't it the Epic and to at least restore Gapyeong. True Mother established PL as pastor of the District and establishing churches where there were none, which was not easy for even one. Even the churches we have we could lose to take our eyes off even a little.

Jojeong Town, Beoktown and Songtown. Songtown I am in charge of which has 14 village and a population of 5,356... It's middle size of the 3. When we went there, there was only one member whose husband ascended. It felt like a barren land and I was worried. When we arrived, we were grateful to find a sturdy senior pastor Pak Yo Man right there. Because of that one family I was happy and felt I had laid all the foundation. We had services at the pastor's home for 5 months... On March 5th 2025, we held the dedication ceremony which was after a year.

Many attended in large number and local leaders also attended... The village leaders in each village and when the African trainees sang a song, the reaction was great. The Unification Church is indeed international, and the people came all the way from Africa to this rural village to sing for them. So we set off very preciously... The village put up the banner, 'FF for World Peace and Unification, Welcome'

He put up two banners himself that had our name. Please do not forget. There used to be 29 Christian churches, every village having 2 or 3, but that decreased to 17. And the place where they disappeared our own was established... Among PL's words, 'If we had at least one church in every nation, how wonderful would that be?'

We had a lot of people in places but no church. After 33 years only was a church established. And Recently there is someone I meet often, a cafe owner and his wife a professor who lived in Italy where she studied and a Japanese member came. As she was listening, she learned she was from the Unification Church, someone who couldn't even speak properly, but was speaking so sincerely about the Rev. Sun Myung Moon.

As this woman settled down, she could meet our members often and was happy for that and I brought her and she is almost our member now. And I visited every village and at first no one welcomed us saying, 'Why are you here?' but if you meet often, people could not swear at you. In order to be the friend, I must meet them often and then teach the Principle.

And as we continued, we found a 430 Blessed couple and hearing we have a church there, she was so happy and attends every week... Another did not receive the Blessing but if so would have been a 36 Blessed Couple. He is close to us, but old, but we visit his house to offer greeting.

A person told us that there was a pioneer church with 20 or 30 at that time, so in that region I did find some of them and difficult to be our members and they brag about how much they know about our church. I wanted to treat them well and we held filial piety banquets and made the food ourselves and served them.

Because the food was made by Japanese members, the food was not the best for Koreans. So, we started to host people in the restaurants, but the cost was quite a lot. But with the heart that food is love, I didn't think that we were wasting the money, and we completed these filial piety banquets. And we told them that such and such a person is our member and responsible for that village.

At first they were suspicious of our intentions, but our pastor who is a sister, she is kind of like a man, even doing the work of 3 men. So, our tribal messiahs work so hard, so to our pastor and H tribal messiah, I told them to always go and offer greeting.

We kept going and explaining and no one denies us any more. And e educated about 400 people through 7 session with the Epic lectures of Cho Yu Kyun and us teaching the Divine Principle after meeting them often... After the lecture, they were saying, 'Oh I have been born as a Korean, and I'm so grateful that there's a meaning behind the Rev. Moon Sun Myung's Birth.

Listening to this people, I felt how pure they are, even more pure than our heart. So, we took them on the cruise and to the Begonia Garden and all around and they were so grateful, even one hanging on to me begging to convey their thanks to Holy Mother Han for making this possible. And our Pastor I Su Jon is trying to pass on the lectures with our members.

And there are many Japanese members and Rev. Yokoi also lectures very well, and they are preparing to

go and give the Epic. On May 5, we are planning to have many go to the villagers and give the lecture at the same time to their own villagers.

PL prepared so well the Gapyeong Festival and many signed to support the Cheonil Sanctum and 58 members came to join... And the person who put up the banner said:

I am I Won Gyu the head of the Sangtown village. Seeing this event, I felt it was so well prepared, and meeting the polite and handsome people, our Sangtown has hope to develop well by meeting these people...

Others had the similar reflection. One 85 years old, attending as a Senior President and he said, Cheonil Sanctum might be the best, well-build building in the world ever that cannot be seen anywhere else. How the picture are with stone.

He has close ties since the Victory of Communism, who respected True Parents deeply. When they hear our church name, they instantly feel close to us. We distributed the Roman noodle.

Korean wives told me they would be ending their Workshop with the GPP and I called them to discuss. PL called and asked me where I was. I said I was in the room and he said to please do the report today. So it was last minute and no power points but what came to my mind, I am sharing this with you now.

Testimony... In the 24 years of being a village head, this was the first time someone had come to everyone in the whole of every village, and please do the event again once a month come again and our GPP members are truly amazing. And he said he so hoped that Dr. Hak Ja Han can come out as soon as possible. applause

He said please come to us once a month and make us the noodle dish. So, whenever we have time after Sunday Service we go around the town, and before SS, we will go to every village at about 9:30am and if they call us to clean. We do trash pickup in every village... 25 people did it and even the village heads were so happy. Elders could not put their trash out, but they were truly happy to have someone to pick it up for them.

We will try our best to create Seongtown very clean and beautifully. Brothers and sisters, I believe that the source of all these activities come from Cheon Shim Won devotion. The ones that offer Cheon Shim Won devotions more than anyone else that settlement can be as soon as possible.

I have 4 sons and 3 daughters. My second daughter always has an emergency situation, with many days she could barely go to school and through it our life was a battle. She couldn't get up in the morning and every time Gay Ga Chan, no matter how many times we call her, she cannot get up and my wife had a battle with her. We did the HJ Paper and central resentment spirit every month, and I could feel she was getting better with this psychological problem.

The doctor guided her well, and he showed and checked all things about our daughter and the effect was amazing, but she barely graduated from hospital, and afterward she was actually accepted in a very good university, the same as Rev. Yokoi san went. As soon as she graduated high school, I was appointed to come to Korea and she came here where I was and with my attending Cheon Shim Won every day and I suggested to here and she offered for two weeks diligently. And when we went, she would sit all the way at the back, and it was difficult for her and during the break she would go out and cry and say she didn't want to go back in.

She was crying because it was so, so hard and she didn't want to be there, and all of us embraced and cried... and when it was time for her to go back to Japan, she said sorry that she should have offered devotion more and she was sorry. After 14 days of Cheon Shim Won vigil she felt bad for her mother and said she started to learn the meaning a little.

She came back to Korea for every vacation, and I told her to just offer devotion even she could not go to the Workshop, and every time she improved more and more, and we were able to give her an opportunity to go to the Workshop. But even sending her to 21-day was so difficult and I heard the CARP staff had a very hard time with her, but since, with that foundation, she was able to attend Cheon Shim Won and then feel she needed the general 40-day Workshop... applause

Many people think it is easy for children to come, but after 20 years of war, it only happened then, and even telling us that she wanted to join... She said she was very moved throughout the time.

Through the Workshop, she changed very much that you could see in her facial expression noticeably and she keeps telling me she realized many things that she had to write down. And my wife was so happy saying, 'My daughter became such a precious daughter of Heavenly Parent and True Parents Heart.'

I'm sure she is listening and laughing at what I am saying, even now with the greatest faith in our family.

Is it easy to bring your children to 40-day as you desire, so hoping for. The best way is a lot of prayer and devotion and when we had money write the HJ Offering Paper. The change depends on you as parents. Why do we treat Cheon Shim Won devotion lightly. Should we not all become completely united and stake our lives on it, this Blessing we have received bringing us into the greatest power of prayer...

Our leaders have been emphasizing (with True Mother) the power of Cheon Shim Won, the greatest gift and key for all problems. But many are not coming, and all of us must repent. Beloved leaders and members, are we the children of True Parents or are we spectators, living comfortably with a moderate level of faith, treating Mother's Words lightly to fall to the ground.

Have you tried living, staking your lives like Jesus' disciples, living and dying for Jesus. Should we also live and die for True Parents? Isn't that so? It is time for us to empty our thoughts and with the desire to cast away their lives as saints, as 12 disciples of Jesus, and I believe we should have greater, true love than them.

Organizations and structures are not the problem, but it is how we are cooling down and distrusting one another. This is the greatest crisis, the weakening of faith. Once trust collapses, it is not easy to rebuild it, and that is the greatest tragedy and cause of our difficulty... Losing the true love of Cheon Shim Won devotion that True Mother has been emphasizing is what we need after True Mother's Words.

True Father said it is a heart that is sacrificial for the sake of the others. You know that the more you invest it, the more it grows, and living for others is where happiness is, giving and forgetting that you gave, that is what true love is. Until it comes naturally, that is the Words of True Father (tears) applause

What is our mission and responsibility now. True Mother said we must come completely united and bring joy back to True Mother, praying as if we are at war with heart of life-or-death devotion. I am embarrassed in front of PL, and that is my life these days. Not many kept the Words of True Parents as thoroughly as he does. All leaders here know this well. He had no break time. He cannot eat properly.

There is no one like him, and as I see him suffering, I realize why True Mother trusts him so much. Now is the time for all of us to offer devotion just like PL. (tears) Let us all unite as one and band together in Cheon Shim Won devotion, and all in the secular world, as the leader puts their flag up, they will run toward it.

Centering on True Mother and Cheon Shim Won and PL's Words, we must become one with the Spirit and Truth of the early days with all the members moving forward with that standard greater than the disciples of Jesus, and I believe that is the path we must take.

gratitude to all the church leaders and Kongnam and all who loved our church...

applause

Break

Hoon Dok Hae

We must reclaim the Status of H Mother, the Feminine aspect of God. The Pacific civilization has been formed during the final era of the Providence centering on the OBD of humanity.

In particular, we must reclaim the status of H Mother, which has been hidden throughout history. God must now be known as the completed Heavenly Parent, not only God the Father, but also God the Mother. There must be the civilization that realizes the ideal of one human family by serving Heavenly Parent and the Vertical Parents of humanity, the True Parents.

The Creator God is not merely a Masculine Subject when viewing the world of creation and viewing human beings. You must clearly understand that life was able to be born because there are H Father and H Mother. However, religious people until now have only looked at one side. Perfection of religion and perfection of human beings cannot be achieved with only one side.

If one cannot welcome the Mother of the Universe, True Mother, there's no salvation for fallen humanity. You must clearly know this essence of God and go the way to become one with God. If you do so, all the problems you have such as race and religion will not be problems.

Heaven prepared to send the OBD through this people. As the chosen people, the Korean people were a people who respected Heaven, were bright in astronomy, achieved an agricultural culture, loved nature and disliked war, finally the time had come to find a Partner for the Marriage Supper of the Lamb, Whom Jesus said would return 2,000 years ago.

Thus, through the foundation of this people, just as God called Jesus 'My Son' after 4,000 years, the OBD was Born Whom God could call, 'My Daughter,' after 6,000 years.' How joyful and full of gratitude a thing this is?

Humanity has struggled through the long history to solve the fundamental problems concerning life and the universe. However, no one has yet given a clear answer to this problem because they have not known the ultimate Principle of how human beings and the universe were originally Created.

Furthermore, we have a more fundamental prerequisite problem remaining. It is not about resulting existence but about causal existence. Therefore, the problems of life and the universe cannot be solved without knowing what kind of being God is Who Created them.

'Way Maker'

Pres. Lee Gi-seong's Message

Today, all attending village are truly victorious. 43,500 gathered...

Our Branch Leaders were able to go out to the field with such accomplishments, and important power and ability is how much Cheon Shim Won devotion results you have made...

The 218th Day of True Mother's Detention. Even though members have gathered to offer prayer and devotion... The First Anniversary of Entrance into the Cheonil Sanctum, in this meaningful time, I offer my gratitude. The path we have walked with True Parents, thinking about Their Course and True Parents's Course, we cannot help but repent, and the prayer we have offered today and the resolution we make, I so hope can lead to True Mother's fully restored health,

We pray to offer devotion as at war so that True Mother can be released not to return to the DC.

And our prayer is not for vacation but to strike our names deeply... As our trainees offer more and more devotion, I hope all the trainees can become new...

Chang Yeh Dong offered the song, 'As We Live Our Lives'. And her mother is Hyeong Jeong Su... She was a very passionate member... When I was in Sonbu Church, she joined our church. Coming from a devoted Christian faith, she was able to understand the Principle very well and she gave birth to the precious daughter Chan Yeh Don.

Her father was sent to the SW when she was at the TC, and before he went he told her that she must go to the 40-day Workshop. And she went just as she promised at that time. The words that a father can leave behind before entering the SW were shared beautifully with his daughter.

And she wanted him to attend her marriage, but because of connecting to hold onto the HJ heart is what's important when a parent leaves, and she can truly make great Heavenly accomplishments... She was a musical actor, but she decided to walk the path of the Will... applause... And how happy would her father be to see her receiving the clapping..

And our sister shared that on August 25th in 2014, the 5th Day of Blessing Anniversary of her parents, and then her father ascended. But because the father took care of her very well, she also decided to take care of herself very well. She received the scholarships and also got her own job working very diligently, received the Blessing very well.

And up to this point, her father always took care of her also from the SW, I believe. It is very great that she came to the 40-day Workshop before she began her family life, making more condition to separate from all the worldly and historical sin life, to make a family that Heavenly Parent and True Parents desire.

So, she came to 40-day without expectation for it, but she was able to meet her own father through her dream. And the full moon was there as they sang the famous folk song in Korea. It's about 'Daughter, daughter what kind of daughter, round like a moon daughter' and She answered that she arose like a daughter' That song so beautiful, and then she saw the full moon.

She felt amazed that his was not a coincidence, and her father just like his name was able I believe to go to a very good place and give his daughter such a great memory even from the SW.

One of the 180 Blessed Couple had her husband go to the SW, and she didn't know that he would ascend so quickly and she so wanted to hear his voice, and she hadn't recorded it. So, please record your husband's voice. Her husband came to her then and he said to come with her, and he was great at the Korean folk songs, and she realized that her husband was at an amazing place in the SW.

Brothers and sisters, your life in the PW will be recorded in the SW. If you think only about your physical body, where is hope. Your body will begin to decline. Our True Father has become the Emperor of Truth and Holiness, and now that True Father is here at the CP, it is time to have memories.

Many members have had memories with True Father, and if they cannot share that, they can become the rock that blocks the path of Providence. You should be able to receive the response of True Father, so that no problem cannot be resolved.

True Mother and members have been able to receive True Father's Heart here... This father of the testimony is working right next to her, and she realized how True Mother was having the conversation with True Father by looking at the moon. And this sister was able to have the heart of HJ and set the standard, and I'm certain she will create such a precious family.

Today, the song Butterfly Affect and the Japanese trainees sang 'God of Night' and many receive grace through that, which is part of the praise, and without judging how they sing, realize they are offering attendance so diligently.

There was one Workshop trainee that never sang praise all the life, but coming here could make their parents so happy to join the praise.

And the sister said she had a lot of pain from a broken Blessing and she lost her path and cried a lot, and if she stayed crying, there would have been a problem escalated, but she realized she shouldn't be like that. During the Workshop, her pain was so deep, but without giving up she offered devotion after devotion and her own mother's testimony came up, how her mother comforted Heaven when she was in prison suffering.

That led her to think about Mother's Heart and we witness how she has been smiling to be the daughter True Mother wanted. 'Let me never lose my smile no matter what happens' and others even said to her the strength they received from that heart behind that smile... I hope she can share the testimony of the hardship to meet her husband.

Sang Pang Chil Secretary General... Sangtown has become the biggest with the most influence very well. All the leaders in that a village started to connect and support us by the foundation of Sangtown, and there were 29, but now 17 churches.

Many people receive grace through how our members pray so diligently. Instead of judging how well they sing, you must think how diligently they are attending through praise, and others can receive so much grace from how they pray and sing with tears... and I hope you applaud them as you watch them praise with all body and heart, making parents so happy.

We must create the environment where the village and the nation can attend Heavenly Parent and True Parents. Even though True Father is in the SW, all the villagers and town's people must attend True Father. During this time when we are attending True Mother on this physical earth, we must lay the foundation so that all the towns and villagers can attend Heavenly Parent and True Parents. That is the Epic History Movement, a Movement for the people.

All the tribal messiahs who are in the 31 villages of Gapyeong County, if they move forward with that direction, I am certain that Heaven's Blessing will be bestowed upon them.

Today you have read from a section of the Divine Principle. You read it well, right. Today so many have struggled to overcome the fundamental problems of life and the universe, but until today no one has a clear answer. Up until now, religious people did not understand fully about God, so that is why they couldn't until Heavenly Parent and True Parents Manifested and gave the Living and written Word of the Principle of Creation meaning with Dual Characteristics of God Father and the True Mother hidden until now.

They were able to introduce Who God really is Who has such characteristics. So within the Words that we have read, the Creator God is not merely a Masculine Subject to the world of Creation and human beings. You must be able to understand that life was able to be created because there was both H Father and H Mother. You must clearly know.

Because JESUS DID NOT KNOW about his fact. (Need appearance of H Mother to know) That is why He called God, Heavenly Father. They would only call out, 'Aboji'. They would only call out to the Father. That is because Jesus only introduced God and Father.

In John Chapter 14, Jesus said, 'You have seen Me, so you have witnessed the Father. Why do you keep on asking? The Father is inside Me and I am inside the Father. Look at Me and you'll see God the Father.'

And after 2,000 years, He has returned. If there was Someone, (Jesus) Who showed Heavenly Father, then there must be Someone Who can Show Heavenly Mother. And that Person Who can show Heavenly Mother IS our True Mother.

We have read True Parents's Words today. The path of civilization had to be formed during the final era of the Providence, centering on the Only Begotten Daughter of Humanity. In particular, we must proclaim the H Mother, the Feminine Aspect of God, which has been hidden throughout human history.

God must now be the Complete and Whole God, shown not only as God the Father but God the Mother. True Mother said that the perfection of human beings cannot happen with only one side. If one cannot welcome the Mother of the Universe, the True Mother, there's no salvation for humanity. You must clearly know the Essence of God and go the way to become one with God.

If you do so, all the problems you have of race and religion will not be problems. Just as God could call Jesus, 'My Only Begotten Son' how joyful and grateful a thing also that now God can call True Mother, 'My Only Begotten Daughter' after 6,000 years. These are the Words of True Parents. There's no Gospel greater than this.

The OBD has come to this land, and we call that a Gospel. The OBD has Come and the True Parents have Manifested, and the fact that True Parents have arrived and been born in this Place is the Gospel of Gospel, as the 'Completed' Form of the Gospel. That is why we must attend Heavenly Parent as Heavenly Parent's Status.

In order to do that we must (be life-and-death filial attendance even more than the disciples of Jesus or anyone else in history)... (Please offer devotion tonight seeking that Heart and Standard)
