7. a TESTIMONIES

This morning at arrival we went to prayer room. At that time when I closed my eyes I could see bright. However after chanyang session when we went to prayer room again, I got paralyzed and just cried until my husband touched me. I was in a narrow black hole, totally alone, nobody around and I could not move my arm. After that when we came out from prayer room to sunshine still I was shaking and feeling cold. About half hour later was better. **My ancestors let me experience where they are and why I need to start their liberation.** After this experience I was really shaking for long time.

Anonymus, sister

7. b TESTIMONIES

I had the same experience several times. I felt like me and Taulant (my husband) were holding hands in a circle in a very beautiful garden with our two children who are 4 and 5 years old. And **above us there were the True Parents in ascension to Heaven, with a very large happy smile on their faces, holding hands and all the times keeping their eyes on us.** This was my returning experience during this two days' workshop whenever I closed my eyes or when I was praying.

Etjola Xhepa, Tirana

7. c TESTIMONIES

...While the chanyang session was going on, I was praying for my ancestors and asking forgiveness from the spirits that had suffered because of my ancestors. While doing this, **I felt hundreds of black spots leaving my body and I could not hold back my tears. It was a calm feeling and liberation, I felt I got their forgiveness and they left quietly.** After the chanyang session, I went to the prayer room and I prayed in the corner because there were many people. I was holding my wife's' hand on my left and I felt that somebody grabbed me from the right elbow and I felt a group of people praying next to us. After prayer, I tried to move to the left because I was thinking about the other people praying on my right, to give them more space, but when I opened my eyes there was nobody on my right side. Even though it was not the deepest prayer, but **it was clear that my ancestors were praying with us** and this made my heart much more calm. Thank you!
