Good morning to you
I hope you're doing well
1330th Tianxin Garden all night sincere

Summary

Father's message on Holy Mother Han Special 40 Day Ordination starting tomorrow

"Welcome to Holy Mother Han special training. Let us not forget that the most important thing in this ordination is to become one with Holy Mother Han. These 40 days are a period to renew all dark forces and past bad habits that have failed to become one with your mother. During this period, I would be happy if you could understand the love of your father and mother, understand the spirit of Holy Mother Han, and develop your own dreams. The girls I love too much. I will do whatever you walk from now on. I will stand beside you fully believing and supporting you in every moment, whether it's hard or sad, happy or happy. So hold on to Holy Mother Han this period and cry out and pray. Honestly speak your feelings before heaven.

I hear all your prayers. So don't worry, don't doubt, and yell out. Only as much as you screamed out, the dark fortune surrounding you disappears, and I can embrace you fully. Pure waters who are our hope and growing new life, we need each of you. Be light and salt in this world for I am with you in everything you decide to move forward. Embrace the world and become hope. I don't call hope for a perfect person. Those who resolve to advance for the will of God, despite lack of love, those who harbor sympathy

towards their fathers and mothers, and those who extend true love to their surroundings are called hope, and those who seek to move forward, we are called hope.

What is Hope, what is Pure Water, moving forward toward higher grounds and wider grounds. Because the attribute of true love is not giving up and moving forward more broadly, you noble born into the true love of true fathers and mothers of heaven and earth will be noble beings to plant and share love in this world. So let us not give up and keep going strong in Holy Mother Han. In this hot summer, let's summon a hopeful wind with a hotter spirit, wipe away the sweat and tears we have shed so far, and let's shine into the future of living well with our loved ones in the true love of our Heavenly Father. I love you. "\

Sending them to the ascetic monks is a shortcut to making shishiko miko, and they are considered the most precious gift, and sending them to ascetic priests is a great

Message from my father yesterday

"In order to wear new clothes, you have to take off the clothes you've been wearing. When you look at the providence of the present, it means dressing as one with Holy Mother Han. All past glories and customs should be striped off and washed with pure water, and adorned with the new providence of Holy Mother Han. How unparental pains your mother's heart to still dwell on the past and say it's your glory, struggle and effort. Many can't take off the clothes of the past. Writing a new history with pure future generations. Compare those who persecute us, even decades of faithlessness and stir up your mother's breast, with those who are now teaching, and the latter ones will receive greater love and grace.

It is important who moves in tune with the heavenly world according to the present order, and who moves

in accordance with the spirit of one's true mother. The lack of individual ability is irrelevant. It's how much that person resonates with your mother's sentiments and does their best, that's what matters. For those who proceed so, heaven gives great power, no matter how insufficient they are. Wrong habits of the past that prevented you from becoming one with your mother, should be considered the feelings of your father and mother and mother, and try to cut them off one by one and make anew. That way I can search my heart for new love and grace. Those who were crying for the arrival of heaven on earth, but now they have entered the era where the heavenly parents directly rule it, but what are they saying? You need the posture of your heart as a heavenly person to enter heaven.

Say the first word for the year of Heaven 13. "The 13th year of Heaven, where the Creator Heavenly Father and Mothers live as an entity, the whole world blessed families become true children of Heavenly Kingdom who fulfill their responsibilities as the elected people united with their true parents." Continuously chanting the nento sign language is the new clothes we should wear in this era. Look back at how you were able to memorize your year marker and practice them well until June. Those who don't remember should start remembering. With the six months remaining of 13 precious heavenly kingdom years, we need to strive to be a true elected blessing family child who lives up to the chronological language given by Holy Mother Han's true mother. Advancement without interruption, if you were facing personal problems, family clan state world problems, look back at how you have been spending this year with the first mark in your heart, and be the one who has remaining six months to show an example as a citizen of heaven. Since this is an important request, I earnestly ask that you become a daughter who fulfills this wish that your mother has asked for. "

Heavenly Father, the real body of the Creator Heavenly Father, came to this place and is waiting for you to take part in the spirit. Mother who is the real Holy Spirit on earth is the role. The era of heaven has revealed to those who believe with all their heart. We are living in an amazing time where we can sort out all the central spirits and covering spirits, grab the heavens and cry out loud. Amazing times when the frequency matches the gate and they'll tell you and act as a role. This Tenshingo showing us that Heavenly Parents who are alive work. If you live today's day for a thousand years to realize this era, I believe next Friday will bring more surprising affairs.

The hour has come when miracles will happen even if we speak loudly against the truth of the providence of heaven. It has become an era when just shouting the truth of providence moves communities to receive revelation. Let us who have the knowledge of the truth not remain silent. God Japan must also stand up and shout. Don't whisper, speak up, they say stand up. The spirit world is close to us, and since the absolute good spirits are the actors, if we pray and do our best, there will be surprising events. Believe it, and pray today with the voice of prayer, that this hour when the heavenly and earthly worlds go forth perfectly as one.
