

Report about the visit by Rev. Jin Hung Yong to the UK  
South London Peace Embassy, 27<sup>th</sup> – 28<sup>th</sup> October 2012  
**“Let us become the Heirs of True Parents’ Life Course and Teaching”**  
by Markus Thonett

---

The Peace Embassy was a comfortable and suitable venue for this inspiring event, and the pastor couple Franklin and Cecilie Fortune made us all feel very welcome. Considering that this presentation is not currently been given anywhere else in the UK, the attendance of around seventy members on each of the two days was surprising. But this did not dampen our spirits in any way. Those who came listened intently to this passionate and fast moving presentation, full of new information regarding True Parent’s life course, as well as new revelations about historical parallels between biblical history and recent events of the Unification Church and the True Family.

We heard many new things as well as messages members have often heard before. We were thus reminded that God’s Providence and eternal, parental heart have not changed, and that His aim remains nothing short of the re-establishment of His original ideal. We learned about the significance of events in the last few days of Father’s earthly life, of the final words he

spoke, the actual timing of Father’s going to the spirit world and of his concluding accomplishments.

Rev. Yong told us that his original intention for the research he conducted into key events of Father’s life, was to confirm for himself that the man he knew to be the Messiah, also led a Messiah’s life. As a result of his research, through interviews recorded on video and documents prosperity, Rev. Yong has not only found the confirmation he sought, but also provided members and historians with valuable evidence of Father’s remarkable life and achievements. Furthermore, this brother sorted Father’s words into separate

topics and graphs which can easily be understood by members with a previous knowledge of the Divine Principle.

We gained a deeper understanding into lineage, the engrafting process, the father/son relationship and the model course that parents and children of Central Blessed Families have to go in order to make providential progress. But beyond the undoubted brilliance of this, almost forensic research and comprehensive presentation skills, (something that did not escape Father's attention, when apparently the Rev. Young once made a two hour and forty minute presentation to him, telling Father his own story!), as the title states: we are encouraged to inherit True Parents' life course and teaching: live for the sake of others, develop tribal messiahship and set up a heavenly tradition of Hoon Dok Hwe in our families. As Jack Corley, our national leader promised when he introduced Rev. Yong to us, the lecture was presented with great enthusiasm and genuine passion.

Rev. Yong told us that we need to gain a better knowledge of the Bible in order to show Christians the real meaning of its often bewildering stories. He went on to give us a clearer understanding of what we must do in order to follow True Parents' victorious example. And he explained about the God of Day and the God of Night, and how True Mother is the earthly presence of the unbreakable union of the True Parents of Heaven, Earth and Humankind.

Rev. Jin Hun Yong is visiting the nations of the world at the request of True Mother and of our international president Hyung Jin Moon. The UK was his 52nd country. He helps us to take a fresh look at the Divine Principle and to better understand current developments in our movement and in the world. He also reminds us all of our own responsibility, while respecting the heavy, providential burden and personal responsibility resting on the shoulders of every member of the True Family. I believe that his message holds the key to a successful conclusion of the closing of the age, and a constructive vision for the fast approaching Foundation Day.

Finally we were truly blessed to have Christa Kamga simultaneously translate both the sense and the sentiment of what this powerful and yet loving and encouraging Korean visitor came to tell us!
