To Leaders at the Boat-Boarding Ceremony , at HJ Marina, Korea

Extract

It is the responsibility of blessed families attending Heavenly Parent on earth to establish, at the very least, a national foundation under Heavenly Parent's dominion.

By this I mean that it is necessary to create an environment that allows Heavenly Parent to freely preside and operate. I am saying that the 50 million people in this country must become Heavenly Parent's children. It means they should become blessed couples that have received the Blessing from True Parents, and citizens of Cheon Il Guk.

We cannot allow this nation and the world to go to ruin at this time when we have dedicated the Cheon Il Sanctum, where we can finally attend Heavenly Parent after 6,000 years.

So what should we do? Each person needs to witness. We must witness. Witnessing. Waking or sleeping, we witness. Without fail, we must put this into practice and succeed.

National restoration. Heavenly Parent's homeland should be restored first. Is that right or not? We must teach about the fundamental nature of the Creator - the Heavenly Parent - and about the mission of the True Parents.

For this reason we can say that the Cheon Shim Won providence is important. It is at the root of an unwavering faith. Each person must personally experience this. Do you understand? [Yes.] Will you do this? [Yes.]
