In the future there will be no translation into Korean. Only those who can understand Korean will be invited to conferences. To the Japanese present, True Father said: You must learn Korean in three years. The Japanese way is not heaven's way. Study Korean, study Korean, study Korean. When you go to the spirit world you should speak Korean, however in the spirit world one uses the language of the heart and therefore earthly languages are not so important. You should spend three times the amount of time you consume eating in studying Korean. Culture comes from language. Korean is a step above Japanese. Your descendants should know the language of your hometown. Those who have not studied Korean have felt it is not important. The Korean National Messiahs must teach Korean for three years. They must raise up someone can become the president of the country. For myself, I still have the mind to study the contents of the book.

You need Korean and Japanese leaders to understand True Parents' tradition. If you can understand me, it is different.

If the Korean National Messiahs don't learn the language of their mission countries, they should go home. You can't just sit in your country and say you only want to teach the principle or only meet the top people. You have to help the unfortunate people as well. You have to be willing to be educated. Dr. Pak thought he was great, so I had to put him down, so that he could become a true person.
